The Elements of Journalism, Revised and Updated 4th Edition Routledge

Did the coverage of the Clinton-Lewinsky scandal set a new low

for American journalism? How has news gathering and reporting changed, and what effects has this had on the political and cultural landscape? In this insightful and thoughtful book, Bill Kovach and Tom Rosenstiel, two of America's leading press watchers, explore the new culture of news--what they call the new Mixed Media Culture--and show how it works. *Warp Speed* describes a world of news in which the speed of delivery is reducing the time for verification, sources are gaining more leverage over the news, and argument is overwhelming reporting. The press, forced to adhere to the demands of the bottom line and keep its

audience, is straining more and more to find the Big Story to package as a form of entertainment, turning news stories into TV dramas; and turning history into a kind of Truman Show. As a result, the role of the press in a self-governing society is undermined. Grounded in extensive research, *Warp Speed* is informed by interviews and testimony from the principal journalists who covered this story and who covered the other great scandals of Washington politics. It offers detailed recommendations on how journalists can right their ship, such as using anonymous sources more responsibly and turning good journalism into good business.

Mobile and Social Media Journalism

Psychology Press
"An indispensable guide." Richard Lederer, author of *The Write Way*, *Sleeping Dogs Don't Lay*, and *Comma Sense -- Journalism* "O'Reilly Media, Inc."
News organisations are struggling with technology transitions and fearful for their future. Yet some organisations are succeeding. Why are organisations such as Vice and BuzzFeed investing in journalism and why are pedigree journalists joining them? Why are news organisations making

journalists redundant but recruiting technologists? Why does everyone seem to be embracing native advertising? Why are some news organisations more innovative than others? Drawing on extensive first-hand research this book explains how different international media organisations approach digital news and pinpoints the common organisational factors that help build their success.
News for All the People: The Epic Story of Race and the American Media Pan Macmillan
Debuting in its first edition *News Now: Visual Storytelling in the Digital Age* helps today's broadcast journalism students prepare for a mobile, interactive, and highly

competitive workplace. The authors, all faculty members of the prestigious Cronkite School of Journalism and Mass Communication, bring their real-world expertise to a book designed to be a trusted reference for the next generation of broadcast journalists. *Just the Facts* Verso Books

James Carey - scholar, media critic, and teacher of journalists - almost single-handedly established the importance of defining a cultural perspective when analyzing communications. Interspersing Carey's major essays with articles exploring his central themes and their importance, this collection provides a critical introduction to the work of this

significant figure. In *James Carey: A Critical Reader*, sever scholars who have been influenced by him consider his work and how it has affected the development of media studies. Carey has examined the roles the media and the academy have played in creating and maintaining a public sphere, as well as the ways technology helps or hinders that project. Carey's themes range from the strains on democracy and drawbacks of technology to the critique of journalism and the politics of academe.

Beyond News

Columbia University Press

Featuring a new code of ethics for journalists and essays by 14 journalism thought leaders and practitioners, this authoritative, practical book examines the new pressures brought to bear on journalism by technology and changing audience habits. It offers a new framework for making critical moral choices, as well as case studies that reinforce the concepts and principles rising to prominence in

21st century communication. The book addresses the unique problems facing journalism today, including how we arrive at truth in an era of abundant and unverified information; the evolution of new business models and partnerships; the presence of journalists on independent social media platforms; the role of diversity; the meaning of stories; the value of images; and the role of community in the production of journalism.

As cash-strapped metropolitan newspapers struggle to maintain their traditional influence and quality reporting, large national and international outlets have pivoted to serving

readers who can and will choose to pay for news, skewing coverage toward a wealthy, white, and liberal audience. Amid rampant inequality and distrust, media outlets have become more out of touch with the democracy they purport to serve. How did journalism end up in such a predicament, and what are the prospects for achieving a more equitable future? In *News for the Rich, White, and Blue*, Nikki Usher recasts the challenges facing journalism in terms of place, power, and inequality. Drawing on more than a decade of field research, she illuminates how journalists decide what becomes news and how news organizations strategize about the

future. Usher shows how newsrooms remain places of power, largely white institutions growing more elite as journalists confront a shrinking job market. She details how Google, Facebook, and the digital-advertising ecosystem have wreaked havoc on the economic model for quality journalism, leaving local news to suffer. Usher also highlights how the handful of likely survivors—well-funded media outlets such as the *New York Times*—increasingly appeal to a global, “placeless” reader. *News for the Rich, White, and Blue* concludes with a series of provocative recommendations to reimagine journalism to ensure its resiliency

and its ability to speak to a diverse set of issues and readers.

The Elements of Journalism CQ Press

A timely new edition of the classic journalism text, now featuring updated material on the importance of reporting in the age of media mistrust and fake news—and how journalists can use technology to navigate its challenges More than two decades ago, the Committee of Concerned Journalists gathered some of America’s most influential newspeople and asked them, “What is journalism for?” Through exhaustive research, surveys, interviews, and public forums, the committee identified the essential elements that define journalism and its role in our society. The

result is one of the most important books on media ever written—winner of the Goldsmith Book Prize from Harvard, a Society of Professional Journalists Award, and the Bart Richards Award for Media Criticism from Penn State University. Updated with new material covering the ways journalists can leverage technology to their advantage, especially given the shifting revenue architecture of news—and with the future of news, facts, and democracy never more in question—this fourth edition of *The Elements of Journalism* is the authoritative guide for journalists, students, and anyone hoping to stay informed in contentious times.

The Elements of
Editing Center Street

A landmark narrative history of American media that puts race at the center of the story. Here is a new, sweeping narrative history of American news media that puts race at the center of the story. From the earliest colonial newspapers to the Internet age, America's racial divisions have played a central role in the creation of the country's media system, just as the media has contributed to—and every so often, combated—racial oppression. News for All the People reveals how racial segregation distorted the information Americans received from the mainstream media. It unearths numerous examples of how

publishers and broadcasters actually fomented racial violence and discrimination through their coverage. And it chronicles the influence federal media policies exerted in such conflicts. It depicts the struggle of Black, Latino, Asian, and Native American journalists who fought to create a vibrant yet little-known alternative, democratic press, and then, beginning in the 1970s, forced open the doors of the major media companies. The writing is fast-paced, story-driven, and replete with memorable portraits of individual journalists and media executives, both famous and obscure, heroes and villains. It weaves back and forth between the corporate

and government leaders who built our segregated media system—such as Herbert Hoover, whose Federal Radio Commission eagerly awarded a license to a notorious Ku Klux Klan organization in the nation’s capital—and those who rebelled against that system, like Pittsburgh Courier publisher Robert L. Vann, who led a remarkable national campaign to get the black-face comedy *Amos 'n' Andy* off the air. Based on years of original archival research and up-to-the-minute reporting and written by two veteran journalists and leading advocates for a more inclusive and democratic media system, *News for All the People* should become the standard

history of American media. *Warp Speed* Oxford University Press, USA For a century and a half, journalists made a good business out of selling the latest news or selling ads next to that news. Now that news pours out of the Internet and our mobile devices—fast, abundant, and mostly free—that era is ending. Our best journalists, Mitchell Stephens argues, instead must offer original, challenging perspectives—not just slightly more thorough accounts of widely reported events. His book proposes a new standard: “wisdom journalism,” an amalgam of the more rarified forms of reporting—exclusive, enterprising, investigative—and

informed, insightful, interpretive, explanatory, even opinionated takes on current events. This book features an original, sometimes critical examination of contemporary journalism, both on- and offline. And it finds inspiration for a more ambitious and effective understanding of journalism in examples from twenty-first-century articles and blogs, as well as in a selection of outstanding twentieth-century journalism and Benjamin Franklin's eighteenth-century writings. Most attempts to deal with journalism's current crisis emphasize technology. This book emphasizes mindsets and the need to rethink what journalism has been and might

become.

The Elements of News Writing Oxford

University Press, USA

"One of America's most experienced and exemplary journalists has written an unsparing analysis of the dreadful consequences -- for journalism and the nation -- of 'how the news lost a race to the bottom with itself.'" -- George F. Will In this national bestseller, Chris Stirewalt, a former Fox News political editor, takes readers inside America's broken newsrooms that have succumbed to the temptation of "rage revenue." One of America's sharpest political analysts, Stirewalt employs his trademark wit and insight to reveal how these media

organizations slant coverage – and why that drives political division and rewards outrageous conduct. The New York Times wrote that Stirewalt's book "is an often candid reflection on the state of political journalism and his time at Fox News, where such post-mortem assessments are not common..." Broken News is a fascinating, deeply researched, conversation-provoking study of how the news is made and how it must be repaired. Stirewalt goes deep inside the history of the industry to explain how today's media divides America for profit. And he offers practical advice for how readers, listeners, and viewers can (and should) become better news consumers for

the sake of the republic.

How do journalists around the world view their roles and responsibilities in society? Based on a landmark study that has collected data from more than 27,500 journalists in 67 countries, *Worlds of Journalism* offers a groundbreaking analysis of the different ways journalists perceive their duties,

their relationship to society and government, and the nature and meaning of their work. Challenging assumptions of a universal definition or concept of journalism, the book maps a world populated by a rich diversity of journalistic cultures. Organized around a series of key questions on topics such as editorial autonomy, journalistic ethics, trust in social institutions, and changes in the profession, it details how the practice of journalism differs across the world in a range of political, social, and economic contexts. The book covers how journalism as an institution is created and re-created by journalists and how they experience their profession in very

different ways, even as they retain a commitment to some basic, widely shared professional norms and practices. It concludes with a global classification of journalistic cultures that reflects the breadth of worldviews and orientations found in disparate countries and regions. *Worlds of Journalism* offers an ambitious, comparative global understanding of the state of journalism in a time when it is confronting a series of economic and political threats.

News for the Rich, White, and Blue
McGraw-Hill Education

How do journalists know what they know? Who gets to decide what good journalism is and when it's done right? What sort of expertise do journalists

have, and what role should and do they play in society? Until a couple of decades ago, journalists rarely asked these questions, largely because the answers were generally undisputed. Now, the stakes are rising for journalists as they face real-time critique and audience pushback for their ethics, news reporting, and relevance. Yet the crises facing journalism have been narrowly defined as the result of disruption by new technologies and economic decline. This book argues that the concerns are in fact much more profound. Drawing on their five years of research with journalists in the U.S. and Canada, in a variety of news organizations from startups and

freelancers to mainstream media, the authors find a digital reckoning taking place regarding journalism's founding ideals and methods. The book explores journalism's long-standing representational harms, arguing that despite thoughtful explorations of the role of publics in journalism, the profession hasn't adequately addressed matters of gender, race, intersectionality, and settler colonialism. In doing so, the authors rethink the basis for what journalism says it could and should do, suggesting that a turn

to strong objectivity and systems journalism provides a path forward. They offer insights from journalists' own experiences and efforts at repair, reform, and transformation to consider how journalism can address its limits and possibilities along with widening media publics.
