This book covers the principles, concepts, techniques and practical tools of financial accounting in supporting overall business decisions. Using a comprehensive theoretical framework, this book is enhanced by practical examples, exercises, chapter summaries and complex cases in each of the eleven chapters. With the International Financial

Reporting Standards (IFRS) and their specific Conceptual Framework as the baseline approach, this book also highlights Romanian regulation and practice specifically. Despite the globalisation efforts, this book demonstrates that there are still discrepancies and cultural challenges and will be of interest to students and academics of financial accounting.
