The Porsche 911 may have been in production for over 40 years, but the modern water-cooled generation share little more than a philosophy with the first examples. Known worldwide by their Porsche internal type number, the 996 models represented a fresh start and offered a new standard in sports car performance and driving satisfaction. This new second edition packs in more specification data. We introduce all the 996 model types, describing the technical specifications, vehicle identification data, performance, colors and options. Using color photography of the cars and many actual problem areas, we introduce each model and what to look for when choosing and buying a used example.

The autobiography of Porsche's most talented engineer. Hans Mezger joined Porsche in 1956 and within a few years was responsible for the design of both the early 1960s F1 engine and subsequently led the design of the six cylinder 911 engine. In 1965 he became head of the new race design office under the charismatic Ferdinand Piëch. Mezger led the development of all the iconic race prototypes of the 1960s, climaxing in the unforgettable 917 program. He was a principal contributor to all sixteen of Porsche's victories in the famed Le Mans 24 Hours. When the McLaren-

TAG F1 team came to Porsche for a turbo engine in the 1980s, he led the design and development that resulted in three consecutive F1 constructors' titles. This personal account of a dedicated and loyal Porsche engineer will touch every enthusiast's heart and underline why the name of Porsche is so respected today.
