A Discourse Delivered Before the Rhode-Island Historical Society,  
December 27, 1865 Routledge

This book traces the impact of exile in the formation of independent republics in Chile and the Río de la Plata in the decades after independence. Exile was central to state and nation formation, playing a role in the emergence of territorial borders and Romantic notions of national difference, while creating a transnational political culture that spanned the new independent nations. Analyzing the mobility of a large cohort of largely elite political émigrés from Chile and the Río de la Plata across much of South America before 1862, Edward Blumenthal reinterprets the political thought of well-known figures in a transnational context of exile. As Blumenthal shows, exile was part of a reflexive process in which elites imagined the nation

from abroad while gaining experience building the same state and civil society institutions they considered integral to their republican nation-building projects.

"The Oxford Handbook of Comparative Political Theory provides an entry point into this burgeoning field by both synthesizing and challenging the terms that motivate it. The handbook demonstrates how mainstream political theory can and must be enriched through attention to genuinely global, rather than parochially Euro-American, contributions to political thinking. Entries emphasize exploration of substantive questions about political life-ranging from domination to political economy to the politics of knowledge-in a range of global contexts, with attention to whether and how those questions may be shared, contested, or reformulated across differences of time, space, and experience. They connect comparative political theory to cognate disciplines including postcolonial theory, area studies, and comparative politics. Creative organizational tools such as tags

and keywords aid in navigation of the handbook to help readers trace disruptions, thematic connections, contrasts, and geographic affinities across entries"--

Domingo Faustino Sarmiento, president of Argentina from 1868 to 1874, is best known as an educator and as the author of *Civilization and Barbarism: The Life of Juan Facundo Quiroga*, generally referred to as *El Facundo*. The contributors to this volume call attention to other facets of Sarmiento's life and to the results of the programs he encouraged. Each contributor has his or her own image of Sarmiento, but whether re-assessing him as a writer, a thinker, or as an advocate of democracy and economic development, all are aware of how the underlying theme of *El Facundo* - the clash between urban and rural worlds, between civilization and barbarism - influenced his outlook. Their essays add to our knowledge not only of Sarmiento, but also of a key transitional period in Argentina's development.

*Theorizing Race in the Americas* Routledge

In 1845 two thinkers from the American hemisphere - the Argentinean statesman Domingo Faustino Sarmiento, and the fugitive ex-slave, abolitionist leader, and orator from the United States, Frederick Douglass - both published their first works. Each would become the most famous and enduring texts in what were both prolific careers, and they ensured Sarmiento and Douglass' position as leading figures in the canon of Latin American and U.S. African-American political thought, respectively. But despite the fact that both deal directly with key political and philosophical questions in the Americas, Douglass and Sarmiento, like African-American and Latin American thought more generally, are never

read alongside each other. This may be because their ideas about race differed dramatically. Sarmiento advocated the Europeanization of Latin America and espoused a virulent form of anti-indigenous racism, while Douglass opposed slavery and defended the full humanity of black persons. Still, as Juliet Hooker contends, looking at the two together allows one to chart a hemispheric intellectual geography of race that challenges political theory's preoccupation with and assumptions about East / West comparisons, and questions the use of comparison as a tool in the production of theory and philosophy. By juxtaposing four prominent nineteenth and twentieth-century thinkers - Frederick Douglass, Domingo F. Sarmiento, W. E. B. Du Bois, and Jose Vasconcelos - her book will be the first to bring African-American and Latin American political thought into conversation. Hooker stresses that Latin American and U.S. ideas about race were not developed in isolation, but grew out of transnational intellectual exchanges across the Americas. In so doing, she shows that nineteenth and twentieth-century U.S. and Latin American thinkers each looked to political models in the 'other' America to advance racial projects in their own countries. Reading these four intellectuals as hemispheric thinkers, Hooker foregrounds elements of their work that have been dismissed by dominant readings, and provides a crucial platform to bridge the canons of Latin American and African-American political thought. *Expanding Borders* University of Virginia Press

Sarmiento utilizó la figura de Juan Facundo Quiroga (1788-1835) para realizar un estudio de la barbarie: en Facundo Quiroga no sólo se ve a un caudillo, sino también una manifestación de la vida argentina, consecuencia de la colonización y de las

peculiaridades del terreno. A través de la biografía del militar, Sarmiento intentó entender los mecanismos del poder tiránico en la Argentina de la época.

The contributions in this volume, a sequel to the volume published in 1986 (SiHoLS 34), treat many aspects of the history of the language sciences in Spain and in Hiberno-America, from the Renaissance and 'Siglo de Oro' to the 20th century. Most papers were published in the journal *Historiographia Linguistica*; they were complemented with a few invited papers.

*The Making of a Race War Paradigm* Univ of California Press  
This book provides the first English translation of *Argirópolis* (1850) by the Argentine Domingo F. Sarmiento, one of the most important political and cultural figures of nineteenth-century Latin America. *Argirópolis* proposes the union of Argentina, Paraguay, and Uruguay into the United States of South America or the United States of the Río de la Plata, with a capital on Martín García island. It anticipates some aspects of the continent's future, such as the formation of Mercosur (the Southern Common Market) in 1991. *Argirópolis* explores politics, modernity, and nation formation, making Sarmiento's treatise one of Argentina and Latin America's most relevant programmatic texts. Presented alongside a critical introduction that situates the essay in its historical and political contexts, this translation allows English-speaking readers to explore nineteenth-century Latin American perspectives on concepts such as the nation-state, sovereignty, progress, space, and modernity.

While contemporary scholars have taken a great interest in diversity or heterogeneity, this model is relatively new and literature of the past is still crying out for its place in the diversity model. This book models five different decolonizing methods to examine both indigenous writing and representations of indigenous peoples by learned elites.

Nonfictional Romantic Prose: Expanding Borders surveys a broad

range of expository, polemical, and analytical literary forms that came into prominence during the last two decades of the eighteenth century and the first half of the nineteenth. They stand in contrast to better-known romantic fiction in that they endeavor to address the world of daily, empirical experience rather than that of more explicitly self-referential, fanciful creation. Among them are genres that have since the nineteenth century come to characterize many aspects of modern life like the periodical or the psychological case study; others flourished and enjoyed wide-spread popularity during the nineteenth century but are much less well-known today like the almanac and the diary. Travel narratives, pamphlets, religious and theological texts, familiar essays, autobiographies, literary-critical and philosophical studies, and discussions of the visual arts and music all had deep historical roots when appropriated by romantic writers but prospered in their hands and assumed distinctive contours indicative of the breadth of romantic thought. SPECIAL OFFER: 30% discount for a complete set order (5 vols.). The Romanticism series in the Comparative History of Literatures in European Languages is the result of a remarkable international collaboration. The editorial team coordinated the efforts of over 100 experts from more than two dozen countries to produce five independently conceived, yet interrelated volumes that show not only how Romanticism developed and spread in its principal European homelands and throughout the New World, but also the ways in which the affected literatures in reaction to Romanticism have redefined themselves on into Modernism. A glance at the index of each volume quickly reveals the extraordinary richness of the series' total contents. Romantic Irony sets the broader

experimental parameters of comparison by concentrating on the myriad expressions of "irony" as one of the major impulses in the Romantic philosophical and artistic revolution, and by combining cross-cultural and interdisciplinary studies with special attention also to literatures in less widely diffused language streams. Romantic Drama traces creative innovations that deeply altered the understanding of genre at large, fed popular imagination through vehicles like the opera, and laid the foundations for a modernist theater of the absurd. Romantic Poetry demonstrates deep patterns and a sharing of crucial themes of the revolutionary age which underlie the lyrical expression that flourished in so many languages and environments. Nonfictional Romantic Prose assists us in coping with the vast array of writings from the personal and intimate sphere to modes of public discourse, including Romanticism's own self-commentary in theoretical statements on the arts, society, life, the sciences, and more. Nor are the discursive dimensions of imaginative literature neglected in the closing volume, Romantic Prose Fiction, where the basic Romantic themes and story types (the romance, novel, novella, short story, and other narrative forms) are considered throughout Europe and the New World. This enormous realm is seen not just in terms of Romantic theorizing, but in the light of the impact of Romantic ideas and narration on later generations. As an aid to readers, the introduction to Romantic Prose Fiction explains the relationships among the volumes in the series and carries a listing of their tables of contents in an appendix. No other series exists comparable to these volumes which treat the entirety of Romanticism as a cultural happening across the whole breadth of the "Old" and

□New□ Worlds and thus render a complex picture of European spiritual strivings in the late eighteenth and the nineteenth centuries, a heritage still very close to our age.

All three books in the American Book Award-winning Memory of Fire Trilogy available in a single volume for the first time. Eduardo Galeano's Memory of Fire Trilogy defies categorization—or perhaps creates its own. It is a passionate, razor-sharp, lyrical history of North and South America, from the birth of the continent's indigenous peoples through the end of the twentieth century. The three volumes form a haunting and dizzying whole that resurrects the lives of Indians, conquistadors, slaves, revolutionaries, poets, and more. The first book, Genesis, pays homage to the many origin stories of the tribes of the Americas, and paints a verdant portrait of life in the New World through the age of the conquistadors. The second book, Faces and Masks, spans the two centuries between the years 1700 and 1900, in which colonial powers plundered their newfound territories, ultimately giving way to a rising tide of dictators. And in the final installment, Century of the Wind, Galeano brings his story into the twentieth century, in which a fractured continent enters the modern age as popular revolts blaze from North to South. This celebrated series is a landmark of contemporary Latin American writing, and a brilliant document of culture.

Many scholars assert that Mexico's complex racial hierarchy, inherited from Spanish colonialism, became obsolete by the turn

of the nineteenth century as class-based distinctions became more prominent and a largely mestizo population emerged. But the residues of the colonial caste system did not simply dissolve after Mexico gained independence. Rather, Ana Sabau argues, ever-present fears of racial uprising among elites and authorities led to persistent governmental techniques and ideologies designed to separate and control people based on their perceived racial status, as well as to the implementation of projects for development in fringe areas of the country. Riot and Rebellion in Mexico traces this race-based narrative through three historical flashpoints: the Bajío riots, the Haitian Revolution, and the Yucatan's caste war. Sabau shows how rebellions were treated as racially motivated events rather than political acts and how the racialization of popular and indigenous sectors coincided with the construction of "whiteness" in Mexico. Drawing on diverse primary sources, Sabau demonstrates how the race war paradigm was mobilized in foreign and domestic affairs and reveals the foundations of a racial state and racially stratified society that persist today.

Cuando Sarmiento escribió el *Facundo* quiso relatar a través de la biografía del caudillo riojano la historia de un pueblo, el que expresaba Juan Facundo Quiroga. Este aspecto valioso del *Facundo*, al considerar al caudillo como expresión del pueblo, no fue tomado en cuenta por la historiografía argentina. La influencia de Sarmiento proyectó la leyenda del *Facundo* como historia, a tal punto que muchos investigadores, tomaron como ciertos los datos que Sarmiento incorporaba sin ninguna base documental.
