The book focuses on the integration of intelligent communication systems, control systems, and devices related to all aspects of engineering and sciences. It includes high-quality research papers from the 3rd international conference, ICICCD 2018, organized by the Department of Electronics, Instrumentation and Control Engineering at the University of Petroleum and Energy Studies, Dehradun on 21–22 December 2018. Covering a range of recent advances in intelligent communication, intelligent control and intelligent devices., the book presents original research and findings as well as researchers' and industrial practitioners' practical development experiences of. *EDRISTI CURRENT AFFAIRS Q & A YEARLY 2018* Springer Nature

Aadhaar was originally pitched as a way to eliminate identity fraud in the delivery of public benefits. Today, its application far exceeds that purpose. Nandan Nilekani, the technology billionaire who was the prime mover behind Aadhaar, has said that "data has become the new oil," and that "if we can restructure data to benefit every individual and every business, then we can lead to enormous amount of activity and economic growth." He has also said, "In the West, the identity business was privatised. That's a much more unsafe model than when a government issues an ID." But while Aadhaar is presented as a way to mobilise Indians' data for the public good, the lines between those who run Aadhaar and those who profit from it are blurry. Also in this issue: Praveen Donthi on how the dilution of the SC/ST Act is reigniting Dalit anger against the BJP and RSS; Nilakantan RS on the deepening fault lines between southern states and the Indian union; Kamayani Sharma on October's experiments with the Bollywood romance genre; Sanam Meher on what Qandeel Baloch left behind; Ross Adkin on how Brexit negotiations are raising uncomfortable questions in Northern Ireland; Senthil Kumaran on the conflict between humans and tigers in India.

Trends, Prospects, and Challenges in Asian E-Governance Saraswati House Pvt Ltd

This collection is a multidisciplinary and multicultural contribution to the current sustainability discourse. It is focused on two main dimensions of our world: complexity and diversity. Desirable and urgent transition of socio-technological systems toward a sustainability trajectory of development requires a better understanding of technological trends and social transformations. General advancement of technology does not produce identical changes in various societies, differentiated economically and culturally. Moreover, the abilities to approach sustainable

development change over time and space. As a result there is a constant need for continuing research, analyses, and discussions concerning changing contexts and adequacy of strategies and policies. Authors from twelve countries and of different academic and cultural settings present their insights, analyses and recommendations. The collection is focused both on contexts and on activities leading to sustainable trajectories in various domains of economy and social life. Continuing research and discussion is needed to better understand these challenges and to prepare the appropriate strategies and solutions. Development of socio-technological systems is nowadays very complex; moreover, the world we live in is extremely diverse. Therefore, sustainability discourse must be ongoing, introducing new ideas, concepts, theories, evidence and experience by various parties—academics, professionals, and practitioners.

Asian countries possess some of the fastest growing economies in the modern world. To maintain this tremendous growth while also sustaining demographic, population, health, and quality of life standards, leaders must take careful stock of past accomplishments and their plans for the future. Trends, Prospects, and Challenges in Asian E-Governance addresses some of the ongoing struggles of fast-developing nations such as China, India, and Indonesia within the context of electronic government, illustrating how digital tools can assist developing nations in maintaining their prospects for future growth and expansion. Employing real-world case studies as well as ongoing research on the growing potential of these Eastern nations, this book serves as a useful reference for government officials, policymakers, and students of public policy in Asia and Oceania.

De Gruyter Handbook of Personal Finance World Bank Publications

The book discusses the concepts of E-Governance from the understanding of a naive user. While providing introduction to the concept, it shows the status of E-Governance in India through various measures, and its progress through different case studies. The historical development of E-Governance around the world and its rise in few developed and developing nations have also been discussed. The book also elaborates the establishment of E-Governance in India in detail and then compares the progress in Indian states through different measures and metrics. The structure of the E-Governance in India has been explained, including the explanation of the details related to National E-Governance Plan. The book is a combination of theoretical and practical concepts defined over various aspects of E-Governance in India. This book serves as the first stage reading material for any individual working in the Indian region on E-Governance.

Banking Awareness For Mains Exam 2022 | 31 Solved Topic-wise Tests For SBI/IBPS/RBI/Clerk/PO & Other Competitive Exams Springer

In principle, no human individual should be rendered stateless: the Universal Declaration of Human Rights stipulates that the right to have or change citizenship cannot be denied. In practice, the legal claim of citizenship is a slippery concept that can be manipulated to serve state interests. On a spectrum from those who enjoy the legal and social benefits of citizenship to those whose right to nationality is outright refused, people with many kinds of status live in various degrees of precariousness within states that cannot or will not protect them. These include documented and undocumented migrants as well as conventional refugees and asylum seekers living in various degrees of uncertainty. Vulnerable populations such as ethnic minorities and women and children may find that de jure citizenship rights are undermined by de facto restrictions on their access, mobility, or security. The Human Right to Citizenship provides an accessible overview of citizenship regimes around the globe, focusing on empirical cases of denied or weakened legal rights. Exploring the legal and social implications of specific national contexts, contributors examine the status of labor migrants in the United States and Canada, the changing definition of citizenship in Nigeria, Germany, India, and Brazil, and the rights of ethnic groups including Palestinians, Rohingya refugees in Bangladesh, Bangladeshi migrants to India, and Roma in Europe. Other chapters consider children's rights to citizenship, multiple citizenships, and unwanted citizenships. With a broad geographical scope, this volume provides a wide-ranging theoretical and legal framework to understand the particular ambiguities, paradoxes, and evolutions of citizenship regimes in the twenty-first century. Contributors: Michal Baer, Kristy A. Belton, Jacqueline Bhabha, Thomas Faist, Jenna Hennebry, Nancy Hiemstra, Rhoda E. Howard-Hassmann, Audrey Macklin, Margareta Matache, Janet McLaughlin, Carolina Moulin, Alison Mountz, Helen O'Nions, Chidi Anselm Odinkalu, Sujata Ramachandran, Kim Rygiel, Nasir Uddin, Margaret Walton-Roberts, David S. Weissbrodt.

In all the book includes around 1350+ MCQ questions in the book.

Bringing E-money to the Poor Publications Division Ministry of Information & Broadcasting
Blockchain technology is powering our future. As the technology behind cryptocurrencies like bitcoin and Facebook's Libra, open software platforms like Ethereum, and disruptive companies like Ripple, it's too important to ignore. In this revelatory book, Don Tapscott, the bestselling author of Wikinomics, and his son, blockchain expert Alex Tapscott, bring us a brilliantly researched, highly readable, and essential book about the technology driving the future of the economy. Blockchain is the ingeniously simple, revolutionary protocol that allows transactions to be simultaneously anonymous and secure by maintaining a tamperproof public ledger of value. Though it's best known as the technology that drives bitcoin and other digital currencies, it also has the potential to go far beyond currency, to record virtually everything of value to humankind, from birth and death certificates to insurance claims, land titles, and even votes. Blockchain is also essential to understand if you're an artist who wants to make a living off your art, a consumer who wants to know where that hamburger meat really came from, an immigrant who's tired of paying big fees to send money home to your loved ones, or an entrepreneur looking for a new platform to build a business. And those examples are barely the tip of the iceberg. As with major paradigm shifts that preceded it, blockchain technology will create winners and losers. This book shines a light on where it can lead us in the next decade and beyond.

Technical Communication for Engineers Penguin

Smart Cities Cybersecurity and Privacy examines the latest research developments and their outcomes for safe, secure, and trusting smart cities residents. Smart cities improve the quality of life of citizens in their energy and water usage, healthcare, environmental impact, transportation needs, and many other critical city services. Recent advances in hardware and software, have fueled the rapid growth and deployment of ubiquitous connectivity between a city's physical and cyber components. This connectivity however also opens up many security vulnerabilities that must be mitigated. Smart Cities Cybersecurity and Privacy helps researchers, engineers, and city planners develop adaptive, robust, scalable, and reliable security and privacy smart city applications that can mitigate the negative implications associated with cyber-attacks and potential privacy invasion. It provides insights into networking and security architectures, designs, and models for the secure operation of smart city applications. Consolidates in one place state-of-the-art academic and

industry research Provides a holistic and systematic framework for design, evaluating, and deploying the latest security solutions for smart cities Improves understanding and collaboration among all smart city stakeholders to develop more secure smart city architectures
