### What Research Has to Say about Fluency Instruction

Houghton Mifflin Harcourt  
On July 24, 1915, the SS Eastland, filled to capacity with 2,500 aboard, capsized in the Chicago River while still moored to the pier. The disaster took more passenger lives than the Titanic and stands today as the greatest loss of life on the Great Lakes. Capsized! details the events leading up to the fateful day of the disaster and provides a nail-biting, minute-by-minute account of the ship's capsizing. It also raises critical-thinking questions for young readers: Why do we know so much about

Titanic's sinking and yet so little about the Eastland disaster? Why was no one ever held responsible for this catastrophe? What lessons from this disaster might we be able to apply today?

Creating Literacy Instruction for All Students Scholastic Professional

This handbook discusses early childhood special education (ECSE), with particular focus on evidence-based practices.

Coverage spans core intervention areas in ECSE, such as literacy, motor skills, and social development as well as diverse contexts for services, including speech-language pathology, physical therapy, and pediatrics.

Contributors offer strategies for planning, implementing, modifying, and adapting interventions to help young learners extend their benefits into the higher grades. Concluding chapters emphasize the importance of research in driving evidence-based practices (EBP). Topics featured in the Handbook include: Family-centered practices in early childhood intervention. The application of

Response to Intervention (Rti) in young children with identified disabilities. Motor skills acquisition for

young children with disabilities. Implementing evidence-based practices in ECSE classrooms.

 Make Rich Math Instruction Come to Life Online In an age when distance learning has become part of the "new normal," educators know that rich remote math teaching involves more than direct instruction, online videos, and endless practice problems on virtual worksheets. Using both personal experience and those of teachers in real K-12 online classrooms, distance learning mathematics veteran Theresa Wills translates all we know about research-based, equitable, rigorous face-to-face mathematics instruction into an online venue. This powerful guide equips math teachers to: Build students' agency, identity, and strong math communities Promote mathematical thinking, collaboration, and discourse Incorporate rich mathematics tasks and assign meaningful

homework and practice Facilitate engaging online math instruction using virtual manipulatives and other concrete learning tools Recognize and address equity and inclusion challenges associated with distance learning Assess mathematics learning from a distance With examples across the grades, links to tutorials and templates, and space to reflect and plan, *Teaching Math at a Distance* offers the support, clarity, and inspiration needed to guide teachers through teaching math remotely without sacrificing deep learning and academic growth.

*Report Together with Minority and Dissenting Views (to Accompany H.R. 2614) (including Cost Estimate of the Congressional Budget Office)*. International Reading Assn Reading fluency has been identified as a key component of proficient reading. Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement. Despite the great potential for fluency to have a significant

outcome on students' reading achievement, it continues to be not well understood by teachers, school administrators and policy makers. The chapters in this volume examine reading fluency from a variety of perspectives. The initial chapter sketches the history of fluency as a literacy instruction component. Following chapters examine recent studies and approaches to reading fluency, followed by chapters that explore actual fluency instruction models and the impact of fluency instruction. Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention. Two articles on assessment, one focused on word recognition and the other on prosody, expand our understanding of fluency measurement. Finally, a study from Turkey explores the relationship of various reading competencies, including fluency, in an integrated model of reading. Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more

integral part of all literacy instruction.

"You know I'm coming. You're dead already."

Hector has always minded his own business, working hard to make his way to a better life someday. He's the chess team champion, helps the family with his job at the grocery, and teaches his little sister to shoot hoops overhand. Until Joey singles him out. Joey, whose older brother, Chavo, is head of the Discípulos gang, tells Hector that he's going to kill him: maybe not today, or tomorrow, but someday. And Hector, frozen with fear, does nothing. From that day forward, Hector's death is hanging over his head every time he leaves the house. He tries to fade into the shadows -- to

drop off Joey's radar -- to become no one. But when a fight between Chavo and Hector's brother Fili escalates, Hector is left with no choice but to take a stand. The violent confrontation will take Hector places he never expected, including a reform school where he has to live side-by-side with his enemy, Joey. It's up to Hector to choose whether he's going to lose himself to revenge or get back to the hard work of living.
