This book provides a philosophically informed, institutionalist account of political leadership. It is rooted in a certain version of the American pragmatist philosophical tradition and privileges the study of institutions as a cause of leadership outcomes. The book adopts a multi-method approach. It includes a laboratory experiment identifying the psychological effects of presidentialism and parliamentarism on leader behavior; a large-n statistical study of the impact of

semi-presidentialism on voter choice; an expert survey of president/cabinet conflict in Europe; an analysis of presidential control over cabinet composition in France; and two in-depth case studies of the circumstances surrounding constitutional choice in France and Romania. This book is aimed at scholars and students of political leadership, political institutions, the philosophy of the social sciences, and research methods. Overall, it shows that an institutional account has the potential to generate well-settled beliefs about the causes of leadership outcomes.

This book sheds new light on the role of the military in Italian society and culture during war and peacetime by bringing together a whole host of contributors across the interdisciplinary spectrum of Italian Studies. Divided into five thematic units, this volume examines the continuous and multifaceted impact of the military on modern and contemporary Italy. The Italian context offers a particularly fertile ground for studying the cultural impact of the military because the institution was used not only for

defensive/offensive purposes, but also to unify the country and to spread ideas of socio-cultural and technological development across its diverse population.

This is a carefully developed work focused on the analysis of supply chain interaction issues in emerging markets and industry sectors. It is a leading-edge handbook that will emphasize areas of study where, thus far, little work has been done and where the "rubber meets the road" – the supply chain process, information, and systems integration. These are pertinent issues facing practitioners and researchers in today's business environment. This is a gap-bridging handbook that analyzes interaction issues from both the research and practitioner sides. The result is a volume that examines and provides practical solutions on interaction issues while being firmly grounded in research principles.

To help you compete, The New Emerging Market Multinationals outlines the disruptive strategies deployed by emerging-market multinationals (EMNCs) and provides breakthrough strategies for following in their footsteps or beating them at their own game.

"This notable militia regiment is named for the old Ontario County, which today falls mostly within the Durham Regional Municipality, and it has strong roots in the region. This illustrated history traces the regiment's origins in the early militia units in the county. The regiment perpetuates two CEF regiments from the First World War and their history is covered here. Before the Second World War the regiment became an armoured (i.e., tank) unit and it fought in the war in both the Italian and North-West Europe campaigns. Since the war, members of the regiment have served on UN peacekeeping assignments and have volunteered for active service in Afghanistan."--

Semi-Presidentialism is the term used to describe the constitutional arrangement where there is a directly elected president and a prime-minister who is responsible to parliament. Examples of semi-presidential regimes include Finland, France, Portugal, Poland, Russia, and Ukraine. These countries share certain constitutional features, but the exercise of presidential and prime-ministerial power varies greatly from one to another. Semi-Presidentialism in Europe examines the politics of semi-presidentialism and explores why it is that seemingly similar political systems operate in such different ways. Furthermore, the book examines the constitutional powers of political leaders, the role of political parties and the importance of past precedent.

With growing international business, small and medium-sized enterprises (SMEs) have been faced with increased competition, but also with enhanced opportunities. Edith Olejnik addresses four major issues within the context of SMEs' internationalization process: First, she identifies the three different internationalization patterns that SMEs take and analyzes how these patterns develop over time. Second, she looks at dynamic changes of foreign operation modes and the managerial reasons for these changes. Third, she derives an empirical classification of smaller family firms and profiles them using a comprehensive set of organizational variables. Fourth, she investigates the relationship between firm-level processes and dynamic capabilities in driving the international performance of SMEs. Based

on theoretical considerations and empirical analyses this work provides important implications for research and management practice.
