A Handbook for New Researchers in the Field Jessica Kingsley Publishers

As the global marketplace grows and becomes more complex, increasing stress is placed upon employees. Businesses are acknowledging this change in work habits by adapting the work place to offer support through multifaith chaplaincy. Multifaith chaplaincy is based on developing relationships of trust between diverse faith communities and the public workplace. Through the experience of starting the first multifaith chaplaincy in Canary Wharf, the author offers insights into current conditions and challenges of chaplaincy in the business community. Writing as an Anglican priest, Fiona Stewart-Darling shows the importance of chaplaincy teams drawing on different faith traditions. This book is an important contribution to the emerging debate around the role of chaplaincy in faith and business communities. This research will be of particular interest to those working in or setting up chaplaincies in different contexts such as hospitals, prisons, town centre chaplaincies working with businesses and business leaders, particularly those involved in diversity and

inclusion in the workplace.

The Next Generation of Chaplaincy A Handbook of Chaplaincy Studies Understanding Spiritual Care in Public Places

Chaplaincy has emerged as a highly significant form of ministry in the twenty-first century, and chaplaincy studies is growing as a field of study that learns from the experience and work of chaplains in their diverse sectors. Chaplains from a range of different faith traditions pioneer ministry within the secular yet religiously plural contexts of contemporary life with often considerable creativity and skill, generating a wealth of insight to be gleaned for understanding the place of faith in the modern world. One of the disciplines that has been most concerned with gleaning those insights and developing the field of chaplaincy studies is practical theology. The journal Practical Theology (formerly Contact) is a key repository for much of the wisdom gained through such study, and this book draws on the archive of the journal to trace the development of chaplaincy research and provide a resource for those seeking to join the conversation about the nature and significance of chaplaincy as a form of ministry and mission today. Drawing on different sectors of chaplaincy and different methodological approaches, this book is invaluable for those engaged in chaplaincy work, those seeking to research that work, and for anyone interested in contemporary, pioneering forms of ministry.

Outcome Oriented Chaplaincy (OOC) is a method of chaplaincy care that emphasizes achieving, describing, measuring, and improving the outcomes that result from a chaplain's work, alongside the parallel framework of evidence-based healthcare. This book examines the underlying principles of OOC and incorporates first-hand accounts of chaplains who have made a measured difference to patients and their families. Brent Peery draws on more than fifteen years of experience within the field of Outcome Oriented Chaplaincy, exploring its evolution and history within the complex culture of healthcare, and how its underlying principles of assessments, interventions, outcomes and documentation are most effectively put into practice. This practical guide will benefit chaplains interested in the approach of OOC, and identify a framework for providing the best spiritual care for those facing life's most difficult moments.

Understanding Muslim Chaplaincy provides a lens through which to explore critical questions relating to contemporary religion in public life, and the institutionalisation of Islam in particular. Providing a rich description of the personnel, practice, and politics of contemporary Muslim chaplaincy, the authors consider the extent to which Muslim chaplaincy might be distinctive in Britain relative to the work of Muslim chaplains in the USA and other countries. This book will make a major contribution to international debate about the place of religion in public life and institutions. This book derives from research that has depended on exclusive access to a wide range of public institutions and personnel who largely work 'behind closed doors'. By making public the work of these chaplains and critically examining the impact of their work within and beyond their institutions, this book offers a groundbreaking study in the field of contemporary

religion that will stimulate discussion for many years to come about Islam and Muslims in Western societies.

Spiritual Care in Common Terms Jessica Kingsley Publishers

Hospital-based pastoral care is a privileged yet complex area of ministry. It involves spiritual journeying to the heights and depths of human experience, often in brief and transient pastoral encounters. Illness and fear lay bare life's realities and there is often need for reconciliation as well as healing. Chaplains, visiting clergy and the growing number of lay volunteers need to be able to interpret pained silences or body language and often in a matter of minutes. This warm-hearted and practical handbook explores the pastoral sensitivities surrounding patient encounters and the challenges of current socio-political pressures. Through stories and examples it explores key biblical themes of love, loss, hope, grace and forgiveness, and worldly themes of dignity, discrimination, identity and choice. It explores the essential skills needed for this kind of ministry: the importance of ritual, difficult pastoral tasks, deflecting anger, caring for the carers, working in multi-faith contexts and more. It also provides a useful section of prayers, readings and other resources for a wide range of pastoral needs.

Increasing the Competency of Chaplains Routledge

These diverse case studies make a compelling case for the importance of effective spiritual care in healthcare and provide unprecedented insight into the essential role of the chaplain within the healthcare team. Presented alongside critical reflections and responses from professionals within chaplaincy, psychology, psychiatry and nursing, they provide an honest and detailed look into how healthcare chaplains actually work with the people in their care and reveal the vital role of narrative and imagination in effective transformative practice. From a 16-year-old with a belief that God would enable a miraculous recovery from paralysis, to an African man with a history of psychosis and depression whose cultural belief in witches complicated his treatment, to a dying Jewish man, aggressive and isolated due to his traumatic life experiences, each case includes insight into the patient's needs and chaplain's perspectives, discussion of spiritual assessments and spiritual care interventions, and accounts of significant encounters and dialogues. The nine paediatric, psychiatric and palliative case studies and reflections in this ground-breaking book will enable chaplains to critically

reflect on the spiritual care they provide and communicate their work more effectively, help healthcare professionals develop a clearer understanding of the care chaplains deliver, and provide an informed perspective for those who develop policy around spiritual care and need to make the case for chaplaincy services.

Interfaith & Practice Routledge

Encouraging a broad, compassionate, humanistic approach to spirituality, this book shows how patients' spiritual needs can be communicated well within interdisciplinary teams, leading to better patient wellbeing. This book describes the art of charting patients' spiritual perspectives in an open way that will help physicians and nurses to better direct medical care. It includes practical information on how to distil spiritual needs into pragmatic language, helping to demystify spiritual experience. Drawing on his extensive practical experience, the author also suggests key points to emphasise that will enrich chart notes for medical records, including brief, relative narratives, trusting one's own impressions, reflecting holistically on the patient's life, patient attitudes towards treatment and recovery, and describing families' opinions on the health care situation of their loved one. The book shows healthcare professionals of all disciplines how to engage in a shared responsibility for the spiritual care of their patients.

The manual provides a rationale for chaplaincy by using Winnifred Sullivan's three categories of religious secularism, irreligious secularism, and areligious secularism to outline the essential and transforming value of spiritual care services (preface, introduction). The manual provides a history of justice initiatives and chaplaincy services in a Canadian context (chapters one and two). The manual provides a rationale for spiritual care-giver training by showing how chaplaincy courses at a university level can build on the competencies of leadership and core knowledge that many ministers, rabbis, imams, priests, nuns, and other faith group representatives have. Emotional intelligence, professional practice skills, and diversity are additional competencies needed for spiritual care-givers to become effective prison chaplains (chapters three to six). Six principles shape the content of this book: (1) integration of chaplaincy into corrections (chapters three to six) (2) understanding of prison dynamics (chapters seven to ten), (3) complementary use of sociology and psychology (chapters eleven to fourteen), (4) provision of faith formation, rites and rituals, programs, pastoral care, and a ministry of presence (chapters fifteen to eighteen), (5) ecumenical and multi-faith religious accommodation (chapters nineteen to twenty-one) and (6) professional development (chapters twenty-four and twenty-five). The manual concludes with a statement of best practices by Dr. Thomas Beckner, long-time chaplaincy educator (*Correctional Chaplains: Keepers of the Cloak*, p. 24). "Chaplains are to have highly polished counselling skills, strong management and facilitation abilities, a working knowledge of various faith group requirements . . . and a strong commitment to serve all residents of the institution regardless of their faith identity or lack thereof."

Each chapter addresses a specific field of allied health practice, such as speech-language therapy, physiotherapy, occupational therapy and other allied health areas. The contributors explain how spiritual care can be applied in their specialist area, making it relevant for all AHPs. With contributions from leading academics and practitioners in allied health practice, this book will help AHPs understand how to give patients the complete care that they need, making this text essential reading for AHP practitioners, clinical supervisors, researchers, academics, tertiary lecturers and allied health students.
