Foreword by Dr. Asad Madni, C. Eng.,
Fellow IEEE, Fellow IEE Learn the
fundamentals of RF and microwave
electronics visually, using many
thoroughly tested, practical examples RF
and microwave technology are essential
throughout industry and to a world of
new applications-in wireless
communications, in Direct Broadcast TV,
in Global Positioning System (GPS), in
healthcare, medical and many other
sciences. Whether you're seeking to
strengthen your skills or enter the field
for the first time, Radio Frequency and
Microwave Electronics Illustrated is the
fastest way to master every key
measurement, electronic, and design
principle you need to be effective. Dr.
Matthew Radmanesh uses easy
mathematics and a highly graphical
approach with scores of examples to
bring about a total comprehension of the
subject. Along the way, he clearly
introduces everything from wave

propagation to impedance matching in
transmission line circuits, microwave
linear amplifiers to hard-core nonlinear
active circuit design in Microwave
Integrated Circuits (MICs). Coverage
includes: A scientific framework for
learning RF and microwaves easily and
effectively Fundamental RF and
microwave concepts and their
applications The characterization of two-
port networks at RF and microwaves
using S-parameters Use of the Smith
Chart to simplify analysis of complex
design problems Key design
considerations for microwave amplifiers:
stability, gain, and noise Workable
considerations in the design of practical
active circuits: amplifiers, oscillators,
frequency converters, control circuits RF
and Microwave Integrated Circuits (MICs)
Novel use of "live math" in circuit
analysis and design Dr. Radmanesh has
drawn upon his many years of practical
experience in the microwave industry
and educational arena to introduce an
exceptionally wide range of practical
concepts and design methodology and
techniques in the most comprehensible
fashion. Applications include small-
signal, narrow-band, low noise,

broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

Best in Show Haynes Manuals N. America, Incorporated
Kawasaki Z1, Z/KZ900 & Z/KZ1000 is for all owners and enthusiasts of the legendary Kawasaki Z1 900, Z/KZ900 and Z1000 built between 1972 and 1980. The book covers the complete restoration of a 1976 KZ900, from the sourcing of the bike to its completion as a fully restored machine. Every area is covered starting with advice on the different models, spares availability, and where best to source a bike to restore. Every area of the restoration is then covered in full detail including the engine, frame, gearbox, wheels, suspension and forks, brakes, ancillaries, bodywork and electrics, accompanied by hundreds of clear color photos to illustrate the text. Additional work on a 1974 Z1A model adds complementary

information. What really sets this manual apart, however, is the style in which it is written: not as some dull and distant workshop manual but in a friendly, humorous manner by an enthusiast of many years who is able to involve and entertain the reader, as well as guiding them through the restoration process. This is the third restoration guide from Chris Rooke, whose previous works have been a massive hit with mechanics, enthusiasts and restorers throughout the world.

Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved,

and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world.

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel

Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of *The Dogist: Photographic Encounters with 1,000 Dogs* by Elias Weiss Friedman, *Dogs* by Lewis Blackwell and Tim Flach, and *Underwater Dogs* by Seth Casteel
