Are some technically competent professionals who work hard and long hours 'true professionals' or are they just cruisers? In this deeply illuminating call to arms, David Maister, the world's premier consultant to professional service firms, vigorously challenges individuals to examine closely the meaning of their work and reach beyond their grasp. The pursuit of the highest standards, Maister argues, is the primary road to commercial success. He presents a visionary reconception of professionalism that encompasses a lifelong dedication to self-improvement, a personal commitment to excellence, and a true spirit of service to clients. Looking first at the individual professional, Maister dares those good corporate citizens who 'do their duty' to discover what they truly love to do. Turning to the institution, Maister focuses on what he calls the 'instability'

of professional service firms today, and offers advice on how to invest in skill building. David Maister's message is a recipe for success and for professional satisfaction making TRUE PROFESSIONALISM a worthy successor to his previous writings.

This year's 'Word Development Report', the twenty-eighth, looks at the role of equity in the development process. It defines equity in terms of two basic principles. The first is equal opportunities: that a person's chances in life should be determined by his or her talents and efforts, rather than by pre-determined circumstances such as race, gender, social or family background. The second principle is the avoidance of extreme deprivation in outcomes, particularly in health, education and

consumption levels. This principle thus includes the objective of poverty reduction. The report's main message is that, in the long run, the pursuit of equity and the pursuit of economic prosperity are complementary. In addition to detailed chapters exploring these and related issues, the Report contains selected data from the 'World Development Indicators 2005'--an appendix of economic and social data for over 200 countries. This Report offers practical insights for policymakers, executives, scholars, and all those with an interest in economic development.

Don't wait for that promotion! Start leading NOW...right where you are! What's the number one question leadership expert John C. Maxwell is asked while conducting his leadership conferences? "How can I implement what you teach when I'm not the top leader?". Is it possible to lead well when you're not the top dog? How about if the person you work for is a bad leader? The answer is a resounding yes! Welcome to The 360° Leader. People who desire to

lead from the middle of organizations face unique challenges. And they are often held back by myths that prevent them from developing their influence. Dr. Maxwell, one of the globe's most trusted leadership mentors, debunks the myths, shows you how to overcome the challenges, and teaches you the skills you need to become a 360° leader. If you have found yourself trying to lead from the middle of the organization, as the vast majority of professionals do, then you need Maxwell's insights. You have a unique opportunity to exercise influence in all directions—up (to the boss), across (among your peers), and down (to those you lead). The good news is that your influence is greater than you know. Practice the disciplines of 360° leadership and the opportunities will be endless . . . for your organization, for your career, and for your life.

**The Helping Relationship** Routledge Create compelling, original characters using archetypes and design elements such as shadows and line with the tips and techniques found in this image-packed book. Bryan Tillman bridges the gap between the technique of drawing characters and the theory of good character design by using case studies, examples of professional art, and literary and pop culture references to teach you how to develop a character, not just draw one. The book also features Character Model Sheets that will guide you through the creation of new and unique characters. Finally, Bryan will break down established character archetypes to show you why and how the different aspects of good character design work. The content on the book is based on Bryan's popular 2009 Comic-Con course on 'Character Design'. Learn what makes a character unique and powerful by using shapes, shadows, and form - this title includes 'character model sheets' so you can put it all together yourself, as well as case studies from established artists. It bridges the gap between the technique of drawing characters and the theory of good

character design in a practical, hands-on way - learn how to use story and archetypes to develop compelling, new characters. Based on a standing-room only presentation at Comic-Con 2009 in San Diego, it features the artwork of a collection of professional artists as examples to the techniques shown in the book.

In *The System of Professions* Andrew Abbott explores central questions about the role of professions in modern life:

Why should there be occupational groups controlling expert knowledge? Where and why did groups such as law and medicine achieve their power? Will professionalism spread throughout the occupational world? While most inquiries in this field study one profession at a time, Abbott here considers the system of professions as a whole. Through comparative and historical study of the professions in nineteenth- and twentieth-century England, France, and America, Abbott builds a general theory of how and why professionals evolve.

Many higher education institutions are like small towns, meeting the needs of their members by providing not only specialist teaching and research activities but also residential accommodation, catering, telecommunications, counselling, sports facilities and so on. The management of these institutions is very complex, requiring both generalist and specialist knowledge and skills; and the move to formal strategic planning means that it is no longer acceptable for higher education managers to be aware only of their own relatively narrow areas of expertise. All new managers would benefit from an holistic perspective on

managing a whole institution. As such individuals are promoted, such 'helicopter vision' becomes a precondition of their and their institution's success. Higher Education Management provides: the first comprehensive account of non-academic higher education management. contributions from distinguished practitioners of university management. a key resource for all aspiring, trainee and practising managers in higher education.

Widely regarded as the most important legal theorist of the twentieth century, Hans Kelsen is best known for his formulation of the "pure theory of law", - within which the study of international law was his special field of work. The present volume, "General Theory of Law and State", first published in 1945, allowed Kelsen to adjust his pure theory of law to American circumstances after World War II. It also afforded him the opportunity to present to English-speaking readers his latest ideas on the supremacy of international law. The volume is divided into two parts: the first devoted to law, the second to the state. Together these topics constitute the most systematic and comprehensive exposition of Kelsen's jurisprudence.
