This report delves into the implications for communities at risk of losing their primary source of credible news. By documenting the shifting news landscape and evaluating the threat of media deserts, this report seeks to raise awareness of the role interested parties can play in addressing the challenges confronting local news and democracy. The Expanding News Desert documents the continuing loss of papers and readers, the consolidation in the industry, and the social, political and economic consequences for thousands of communities throughout the country. It also provides an update on the strategies of the seven large investment firms--hedge and pension funds, as well as private and publicly traded equity groups--that swooped in to purchase hundreds of newspapers in recent years and explores the indelible mark they have left on the newspaper industry during a time of immense disruption.

This book critiques and extends the analysis of power in the classic, *Who Rules America?*, on the fiftieth anniversary of its original publication in 1967--and through its subsequent editions. The chapters, written especially for this book by twelve sociologists and political scientists, provide fresh insights and new findings on many contemporary topics, among them the concerted attempt to privatize public schools; foreign policy and the growing role of the military-industrial component of the power elite; the successes and failures of union challenges to the power elite; the ongoing and increasingly global battles of a major sector of agribusiness; and the surprising details of how those who hold to the egalitarian values of social democracy were able to tip the scales in a bitter conflict within the power elite itself on a crucial banking reform in the aftermath of the Great Recession. These social scientists thereby point the way forward in the study of power, not just in the United States, but globally. A brief introductory chapter situates *Who Rules America?* within the context of the most visible theories of power over the past fifty years--pluralism, Marxism, Millsian elite theory, and historical institutionalism. Then, a chapter by G. William Domhoff, the author of *Who Rules America?*, takes us behind the scenes on how the original version was researched and written, tracing the evolution of the book in terms of new concepts and research discoveries by Domhoff himself, as well as many other power structure researchers, through the 2014 seventh edition. Readers will find differences of opinion and analysis from chapter to chapter. The authors were encouraged to express their views independently and frankly. They do so in an admirable and useful fashion that will stimulate everyone's thinking on these difficult and complex issues, setting the agenda for future studies of power.

As you study the prophetic books, imagine the strong and courageous prophets of Yahweh, who fearlessly proclaimed God's Word, and listen to their messages in relation to your own life--return, repent, and be renewed. Trust in God's redemption through Christ and rejoice. The OT prophets revealed the Word of God for not only their time, but also for all future generations. The Bible's own understanding of a "prophet" is fundamentally a spokesperson, interpreter, and mediator of God's will. The prophet's message is called a "prophecy" and sometimes it is termed a vision, oracle, or burden, but most often, it is identified as "the word of the LORD."
