This professionally challenging volume--focusing on the performance and status of Certified Occupational Therapy Assistants (COTAs)--serves as a basis for reexamination and redefinition of the relationship between occupational therapists and assistants. Experts offer constructive possibilities for resolving some of the ongoing conflicts about the appropriate functions and education of COTAs and promote examination of the appropriate levels of function and education for the occupational therapist. The selected topics, chosen for their value and relevance to all occupational therapists--OTRs, COTAs, clinicians, and academicians--address the administrative issues regarding efficient use of COTAs and opportunities for their career development and job satisfaction; models of COTA practice described by COTAs who developed and implemented them within the framework of their jobs; and issues of concern to COTAs primarily as expressed by COTAs, with proposals and strategies for their resolution.

Clinically-Oriented Theory for Occupational Therapy Mosby

Domestic abuse has reached epidemic proportions in the United States. Are you prepared to work with the people whose lives it has changed? Domestic Abuse Across the Lifespan: The Role of Occupational Therapy reframes the problem of domestic violence, taking it out of the home and into the practice of occupational therapy. It identifies the effects of all types of domestic abuse (spousal, child, elder, etc.) as well as frameworks to address dysfunction that has occurred secondary to the abuse. This book shows that the effects of domestic abuse are indeed in the realm of occupational therapy practice, and that just as occupational therapists would consider other environmental concerns (i.e. kitchen and bathroom safety), they must also consider abuse and its effects. Domestic Abuse Across the Lifespan: The Role of Occupational Therapy provides you with: definitions and illustrative examples of each type of domestic violence risk factors for becoming a victim or an abuser an examination of the occupational therapist's role with victims of abuse reasons why women may decide to refuse intervention a discussion of the connection between victim advocacy and occupational therapy a case study detailing the clinical findings and treatment of a six-month-old infant with shaken baby syndrome who received in-patient occupational therapy a case study of a child witness of domestic abuse and the use of the Occupational Therapy Psychosocial Assessment of Learning (OT PAL) in measuring the psychosocial aspects of his performance in a nontraditional classroom setting a checklist for occupational therapists who encounter elder abuse and a case study that illustrates its use . . . and much more! The number of people whose lives are scarred by domestic abuse is vast and growing every day. Occupational therapists working in many different settings will encounter children, adults, elders, and individuals with disabilities who have experienced intimate violence and abuse. Domestic Abuse Across the Lifespan: The Role of Occupational Therapy is the tool to help you help them.

Renée Taylor and an international team of contributors carry on Gary Kielhofner's innovative vision to demystify the research process and demonstrate that research is essential to occupational therapy practice. They present a comprehensive guide to conducting applied research in the field from qualitative, quantitative, and mixed perspectives for students and clinicians. You'll begin with a grounding in conducting evidence-based practice in OT and an explanation of the six broad components of the research process. Then you will explore research designs, measurements, and statistical analysis for qualitative and quantitative studies. You'll examine the steps and procedures required to conduct research and how research can be used to shape professional practice and improve patient care.
