Written by Peter Moon and Radu Cinamar, a highly placed Romanian intelligence operative, this book heralds the most remarkable archaeological find in the annals of Mankind. Unbeknownst to most, there is an ancient sphinx located in the Bucegi Mountains of Romania. In 2003, the Pentagon discovered, through the use of satellite technology, an anomaly beneath this ancient sphinx. Through the highest levels of Freemasonry, the Pentagon was able to secure an alliance with the most secret department of the Romanian Intelligence Service which is known as Department Zero. Together, the Romanians and the Americans utilised the Pentagon's secret technology to penetrate a hidden chamber beneath the sphinx which was otherwise inaccessible to humans. What was discovered eventually was a holographic Hall of Records left by an advanced civilisation near three mysterious tunnels leading into the Inner Earth. The book chronicles the discovery of these modern day artefacts which represent the dawn of a new era for Mankind. Peter Moon is brought into the fold through his friend, Dr David Anderson, the mysterious scientist who founded the Time Travel Research Center on Long Island and also maintains a similar facility in Romania. Recognising that such satellite technology would had to have utilised Dr Anderson's proprietary space-time technology for maintaining satellites in orbit, Peter Moon pursues these matters further and accepts Dr Anderson's invitation to Romania where he visits the Romanian Sphinx and learns of a mysterious association between the mysterious time travel scientist and Radu Cinamar.

Family Background Influence on Romanian's [sic] Youth Voting Behaviour Farrar, Straus and Giroux

A stunning novel, spanning generations and continents, *Ghana Must Go* by rising star Taiye Selasi is a tale of family drama and forgiveness, for fans of Zadie Smith and Chimamanda Ngozi Adichie. This is the story of a family -- of the simple, devastating ways in which families tear themselves apart, and of the incredible lengths to which a family will go to put itself back together. It is the story of one family, the Sais, whose good life crumbles in an evening; a Ghanaian father, Kweku Sai, who becomes a highly respected surgeon in the US only to be disillusioned by a grotesque injustice; his Nigerian wife, Fola, the beautiful homemaker abandoned in his wake; their eldest son, Olu, determined to reconstruct the life his father should have had; their twins, seductive Taiwo and acclaimed artist Kehinde, both brilliant but scarred and flailing; their youngest, Sadie, jealously in love with her celebrity best friend. All of them sent reeling on their disparate paths into the world. Until, one day, tragedy spins the Sais in a new direction. This is the story of a family: torn apart by lies, reunited by grief. A family absolved, ultimately, by that bitter but most tenuous bond: familial love. *Ghana Must Go* interweaves the stories of the Sais in a rich and

moving drama of separation and reunion, spanning generations and cultures from West Africa to New England, London, New York and back again. It is a debut novel of blazing originality and startling power by a writer of extraordinary gifts. 'Ghana Must Go is both a fast moving story of one family's fortunes and an ecstatic exploration of the inner lives of its members. With her perfectly-pitched prose and flawless technique, Selasi does more than merely renew our sense of the African novel: she renews our sense of the novel, period. An astonishing debut' Teju Cole, author of *Open City* Taiye Selasi was born in London and raised in Massachusetts. She holds a B.A. in American Studies from Yale and an M.Phil. in International Relations from Oxford. Designing Geodatabases for Transportation addresses the development of a GIS to manage data relating to the transportation facilities and service commonly organized around various modes of travel for accurate and reliable data exchange. Transportation involves several modes of travel, and although the details of each mode can be quite different, this book demonstrates how all follow a basic conceptual structure. That structure consists of an origin, a destination, a path between the two, and a conveyance that provides the ability to move along the path to establish a common data structure.

"In "Ichthyology," a young boy watches his father spiral from divorce to suicide. The story is told obliquely, often through the boy's observations of his tropical fish, yet also reveals his father's last desperate moves, including quitting dentistry for commercial fishing in the Bering Sea. "Rhoda" goes back to the beginning of the father's second marriage and the boy's fascination with his stepmother, who has one partially closed eye. This eye becomes a metaphor for the adult world the boy can't yet see into, including sexuality and despair, which feel like the key initiating elements of the father's eventual suicide. "A Legend of Good Men" tells the story of the boy's life with his mother after his father's death through the series of men she dates." "In "Sukkwan Island," an extraordinary novella, the father invites the boy homesteading for a year on a remote island in the southeastern Alaskan wilderness. As the situation spins out of control, the son witnesses his father's despair and takes matters into his own hands. In "Ketchikan," the boy is now thirty years old, searching for the origin of ruin. He tracks down Gloria, the woman his father first cheated with, and is left with the sense of "a world held in place, as it turned out, by nothing at all." Set in Fairbanks, where the author's father actually killed himself, "The Higher Blue" provides an epilogue to the collection."--BOOK JACKET.

Lucian Blaga (1895-1961) is judged by many to be Romania's most original philosopher and greatest poet of the twentieth century. While scholars with access to his works in Romanian are well-aware of their importance, his work has remained, up to now, little known in the English-speaking world. The book represents one of the first efforts to make Blaga's work accessible to an international audience. *Zalmoxis* is Blaga's first play and one of his most important literary works. It underlines much of his philosophy and also reflects his poetry. Blaga's attachment to Expressionist ideals is discernible in his treatment of the characters primarily as vehicles of ideas and his preference for primitive nature over the cultured metropolis. This book includes an introduction by Keith Hitchins of the University of Illinois, one of the leading historians of Romania in the United States and a scholar intimately acquainted with Blaga's life and work. In it, he discusses the life of Lucian Blaga, and the importance of his literary and philosophical work. The translation is by Doris Plantus-Runey from Wayne State University in the United States.

In the tradition of Sándor Márai, Mihail Sebastian is a captivating Central European storyteller from the first half of the twentieth century whose work is being rediscovered by new generations of readers throughout Europe, Latin America, and the United States. The 2000 publication of his *Journal 1935-1944: The Fascist Years* introduced his writing to an English-speaking audience for the first time, garnering universal acclaim. Philip Roth wrote that Sebastian's *Journal* "deserves to be on the same shelf as Anne Frank's *Diary* and to find as huge a readership." Outside of the English-speaking world, Sebastian's reputation rests on his fiction. This publication of *The Accident* marks the first appearance of the author's fiction in English. A love story set in the Bucharest art world of the 1930s and the Transylvanian mountains, it is a deeply romantic, enthralling tale of two people who meet by chance. Along snowy ski trails and among a mysterious family in a mountain cabin, Paul and Nora, united by an attraction that contains elements of repulsion, find the keys to their fate. Mihail Sebastian (1907-1945) was born in southeastern Romania and worked in Bucharest as a lawyer, journalist, novelist, and playwright until anti-Semitic legislation forced him to abandon his public career. His long-lost diary, *Journal 1935-1944: The Fascist Years*, was published in seven countries between 1996 and 2007, launching an international revival of his work. Sebastian's novels and plays are available in translation throughout Europe, and also have been published in Chinese, Hindi, Bengali, and Hebrew.

"Fascinating. Doidge's book is a remarkable and hopeful portrait

of the endless adaptability of the human brain.”—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge’s inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they’ve transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

Après avoir exploré plusieurs des lois de l'univers dans son précédent ouvrage, Isaac Plotain nous emmène à la découverte de deux voies de réalisation. Il raconte sa vie de chercheur dans la voie alchimique, comment il découvre l'histoire secrète des Frères Aînés de la Rose Croix, comment des Frères Chevaliers d'Héliopolis le contactèrent et lui apportèrent une aide précieuse dans la réalisation de ses travaux. Il explique comment ses recherches le conduisirent à découvrir la voie du coeur, comment s'opère le processus physiologique qui permet d'atteindre le même état que celui des Maîtres Alchimistes du passé et prolonger durablement la vie. Il nous invite à mettre en application cette voie du coeur dans notre vie quotidienne, à élargir notre conscience et notre reconnaissance d'appartenir à la fraternité universelle... Du point de vue spirituel, la grande majorité des aspirants sont encore des enfants ! En spiritualité, l'urgence des temps n'existe pas. Paul Froese explores the nature of religious faith in a provocative examination of the most massive atheism campaign in human history. That campaign occurred after the 1917 Russian Revolution, when Soviet plans for a new Marxist utopia included the total eradication of all religion. Even though the Soviet Union's attempt to secularize its society was quite successful at crushing the institutional and ritual manifestations of religion, its leaders were surprised at the persistence of religious belief. Froese's account reveals how atheism, when taken to its extreme, can become as dogmatic and oppressive as any religious faith and illuminates the struggle for individual expression in the face of social repression.
