Integrating Service Learning and Multicultural Education in Colleges and Universities Psychology Press

The focus of this book is on the ways in which service learning and multicultural education can and should be integrated so that each may be strengthened and consequently have greater effect on educational and social conditions. It offers a significant attempt to forge a dialogue among practitioners of service learning and multicultural education. The overriding theme is that service learning without a focused attention to the complexity of racial and cultural differences can reinforce the dominant

cultural ideology, but academic work that seeks to deconstruct these norms without providing a community-based touchstone isolates students and schools from the realities of the larger communities of which they are part. Although the chapter authors provide varied perspectives on the benefits and challenges of integrating multicultural education and service learning, they all are committed to a vision of education that synthesizes both action and reflection. None of the authors pretend to have all the answers to what this integration should look like, nor do they believe that today's social problems are easily ameliorated through education. Rather, they share theories, practices, failures, and triumphs in order to further the conversation about the importance

of aligning what educators say about the world and how they act in and on it. These authors share the view that multicultural education is truly transformative for students only when it includes a community action component, and likewise, service learning is truly a catalyst for change only when it is done from a multicultural and socially just perspective. It is their hope that the ideas explored in this book will further the work of those who share a commitment to the integration of action and reflection.

 Routledge

Now available in paperback, the sixth edition of this definitive text provides students a strong background in the conceptual, theoretical, and philosophical issues in multicultural education from a leading authority and scholarly leader of the field---James A. Banks. In the opening chapter author Banks presents his well-known and widely used concept of Dimensions of

Multicultural Education to help build an understanding of how the various components of multicultural education are interrelated. He then provides an overview on preparing students to function as effective citizens in a global world; discusses the dimensions, history, and goals of multicultural education; presents the conceptual, philosophical, and research issues related to education and diversity; examines the issues involved in curriculum and teaching; looks at gender equity, disability, giftedness, and language diversity; and focuses on intergroup relations and principles for teaching and learning. Language, Culture, and Teaching

SUNY Press

This unique volume takes readers behind the scenes for an "insider/outsider" view of education policymaking in action. Two state-level case studies of social studies curriculum reform and textbook policy (California and New York) illustrate how curriculum decision making becomes an arena in which battles are fought over national values and priorities. Written by a New York education professor and a California journalist, the text offers a rare blend of academic and journalistic voices. The "great speckled bird" is the authors' counter-symbol to the bald eagle--a metaphor representing the racial-ethnic-cultural diversity that has characterized the U.S. since its beginnings and the multicultural reality of American society today. The text breaks new ground by focusing on the

intersections of national debates and education policymaking. It situates the case studies within historical and contemporary cultural contexts--with particular attention to questions of power and knowledge control and how influence is exercised. By juxtaposing the contrasting cases of California and New York, the authors illustrate commonalities and differences in education policymaking goals and processes. By sharing stories of participants at and behind the scenes, policymaking comes alive rather than appearing to result from impersonal "forces" or "factors."

Multicultural and Diversity Education

Rowman & Littlefield Publishers

How do multicultural children and their parents experience the very beginning of their school careers? How do teachers mediate the demands of the educational system, and how do the children adapt? What kind of access to the National Curriculum is offered to multicultural children? Originally published in 1999, the authors answer these questions by drawing on two years' intensive research in three multi-ethnic institutions. They

explore teachers' values and beliefs and how they attempt to put them into practice. They describe how, at times, teachers were constrained to get things done because of pressures operating on them, but at other times, taught creatively in a way particularly relevant to the children's concerns and cultures. The authors studied the children's experiences on their transition into school, and argue that they were inducted into not only a general pupil role, but also one based on an anglicised model of pupil. Opportunities for learning which children found most meaningful came notably from free play, but these became gradually more limited as they engaged with the National Curriculum. These young children were forming complex identities as they sought to

respond to the varying influences operating them. Their parents saw a cultural divide opening up between home and school. Many suggestions for practice and policy are made in the course of the book and are still relevant today.

Pearson College Division
Bringing together scholarship from both sides of the Atlantic, this book focuses on the questions that shape the field of multicultural education, offering the reader an opportunity to achieve a real grasp of the subject.

Teaching for Racial and Cultural Justice Routledge

This conceptually rich and empirically grounded book draws upon expertise from a panel of emerging and established international scholars to

explore the institutionalization and effect of multicultural education on a global scale. Previous studies of multicultural education have largely ignored the significance of understanding the combination of multiple sociopolitical influences on multicultural education in both policy and practice. Filling this void, this book sheds light on the two main reasons for taking a “glocal” perspective on multicultural education. First, children should be provided with meaningful learning opportunities to acquire the knowledge, skills, and attitudes necessary to live in a culturally and ethno-linguistically diverse society, where the distinction between the local and the global is becoming blurred. Second, understanding both the “global grammar” and the “local semantics” of

multicultural education helps researchers and policy-makers grasp the whole picture of multicultural education as an evolving social construct and phenomenon. This new book provokes a new round of discussion and research to expand and enrich our inquiry into cultural diversity and educational inclusion.

The Great Speckled Bird Rowman & Littlefield

This book analyses the experiences of multicultural education in nine very different international settings uncovering insights from a vast variety of educational contexts. Taking a multi-critical approach in reporting and discussing problems faced by increasingly multicultural and multilingual societies the nine case

studies reflect radically different assumptions about what counts as ‘difference’ and what should be the appropriate ways for education systems to respond to differences. While each country’s approach seems unique, analysis of the divergent treatments of internal population diversity elicits a genuinely global instance of the increasingly shared phenomenon of cultural pluralism. Discussing various successes and failures of policy enactment, theory, pedagogy and management of diversity, the book isolates both the differences and similarities in the unique geopolitical and socio-historical contexts of the countries investigated. A key value of the book is that it greatly expands the range of settings, experiences, epistemologies,

ontologies and practical experiences that are typically encountered in mainstream discussion of what counts as 'multicultural education'. In effect, all societies are in some way 'dealing with difference' – this volume helps widen the scope of reflection and thus facilitates increased, global 'learning from difference'.

Teaching and Taking Diversity Courses

An Introduction to Multicultural Education

Each year, the United States witnesses significant changes in the demographics of its citizens. Accordingly, schools—and the students we teach—are also changing. With such changes come the need, responsibility, and obligation for educators to provide students with an education that is both rigorous and

culturally responsive. This book bridges the gap that exists between educating advanced learners and educating culturally different learners. *Multicultural Gifted Education, 2nd ed.* addresses various topics, including racially and culturally diverse students and families, historical and legal perspectives on educating gifted and minority students, culturally responsive curriculum and assessment, and counseling students from a multicultural perspective.
