describes the earth as 'the new poor', opening it up as a place in need of liberation. The fate of the poor, the marginalised, and those on the wrong side of the western colonial

project is inextricably tied up with the fate of the planet. In A Liberation for the Earth Anupama Ranawana explores the nexus between climate, race and the

liberative potential of the cross. Reflecting on the entanglement between colonialization and the destruction of the planet, she considers how this entanglement is played out and resisted within faith based and secular ecological justice movements in Canada, Sri Lanka and the United Kingdom.

The second half of the nineteenth century marks a watershed in human history. Railroads linked remote hinterlands with cities; overland and undersea cables connected distant continents. New and accessible print technologies made the wide dissemination of ideas possible;

oceangoing steamers carried goods to faraway markets and enabled the greatest long-distance migrations in recorded history. In this volume, leading scholars of the Islamic world recount the enduring consequences these technological, economic, social, and cultural revolutions had on Muslim communities from North Africa to South Asia, the Indian Ocean, and China. Drawing on a

multiplicity of approaches and genres, from commodity history to biography to social network theory, the essays in Global Muslims in the Age of Steam and Print offer new and diverse perspectives on a transnational community in an era of global transformation . Ê

This remarkable

book brings to an English-speaking audience detailed scholarship originally conceived and written in the Malay language and with a Malay perspective. It examines the nature of monarchy in the Malay world, which includes present-day Malaysia and Indonesia, before and during the onset of Western colonialism when the Malay world was ruled by a large number of separate

Muslim sultanates. It highlights that monarchs were the highest authority in the social, political, legal and economic system, rather than the government of a clearly defined territory; the notion of Dewaraja (god-king) and what a model monarch's attributes should be; and how the monarch's role related to Islamic principles, including the Islamic ideal of the Caliph of God meting

out fair judgement and punishment. Two prominent and pivotal concepts of traditional Malay society, that of daulat (sovereignty) and derhaka (disloyalty) are here analysed and evaluated against the background of the period of absolute monarchy. Moreover, this volume also discusses the parts played by leading ministers and viziers, who often exercised enormous

power, explores the role of monarchs in managing and regulating economic activity, and outlines differences between the different sultanates.

A state-of-the-art, one-stop resource, Public Administration in South Asia: India, Bangladesh, and Pakistan examines public administration issues and advances in the Indian subcontinent. The book fulfills a critical need. These nations have the largest public administration programs in South Asia, yet existing knowledge on them is fragmented at best. Bringing together leading scholars from these countries, this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region. Focusing on the machinery of government, the book explores questions such as: What is the history of public administration development? How are major decisions made in the agencies? Why are anti-corruption efforts so much a challenge? What is the significance of intergovernmental relations? What is the success of administrative reform? What are examples of successful social development programs?

How successful is e-government, and what are its challenges? Why is civil service reform difficult to achieve? How is freedom of information being used as a means to combat corruption and invoke grassroots activism? What can be learned from the successes and failures? While public administration practice and education have become considerably professionalized in the last decade, a sufficiently in-

depth and well-rounded reference on public administration in these countries is sorely lacking. Most available books tackle only aspects of public administration such as administrative reforms, civil service, economic developments, or public policy, and are country specific. None provide the in-depth analysis of the sphere of public action in South Asia found in this book. It supplies an

understanding of how public administration can be either the source of, or solution to, so many of the problems and achievements in the Indian subcontinent.

Reading the Sacred Scriptures: From Oral Tradition to Written Documents and their Reception

examines how the scriptures came to be written and how their authority has been constructed and reinforced over time. Highlighting the measures taken to safeguard the stability of oral accounts, this book demonstrates the care of religious communities to maintain with reverence their assembled parchments and scrolls. Written by leading experts in their fields,

this collection chronicles the development of the scriptures from oral tradition to written documents and their reception. It features notable essays on the scriptures of Hinduism, Judaism, Buddhism, Zoroastrianism, Confucianism, Daoism, Christianity, Islam, Sikhism, Shinto, and Baha'i. This book will fascinate anyone interested in the belief

systems of the featured religions. It offers an ideal starting point from which undergraduate and postgraduate religious studies students, teachers and lecturers can explore religious traditions from their historical beginnings. *Schooling Corporate Citizens World Health Organization*

Citizens examines the full history of accountability reform in the United States from its origins in the 1970s and 1980s to the development of the Common Core in recent years. Based in extensive archival research, it traces the origins and development of accountability reform as marked by key government- and business-led reports—from A Nation at Risk to No

Child Left Behind and Race to the Top. By using the lens of social studies and civic education as a means to understand the concrete impacts of accountability reforms on schools, Evans shows how reformers have applied principles of business management to schools in extreme ways, damaging civic education and undermining democratic learning. The first full-length narrative account of

<p>accountability reform and its impact on social studies and civic education, Schooling Corporate Citizens offers crucial insights to the ongoing process of American school reform, shedding light on its dilemmas and possibilities, and allowing for thoughtful consideration of future reform efforts.</p> <p><i>Global Muslims in the Age of Steam and Print</i> Cambridge University Press Interpreting</p>	<p>Southeast Asia's Past: Monument, Image and Text features 31 papers read at the 10th International Conference of the European Association of Southeast Asian Archaeologists , held in London in September 2004. Routledge Disasters and History offers the first comprehensive historical overview of hazards and disasters. Drawing on a range of case studies, including the Black Death, the Lisbon earthquake of 1755 and the Fukushima disaster, the authors examine how societies dealt with shocks and hazards

and their potentially disastrous outcomes. They reveal the ways in which the consequences and outcomes of these disasters varied widely not only between societies but also within the same societies according to social groups, ethnicity and gender. They also demonstrate how studying past disasters, including earthquakes, droughts, floods and epidemics, can provide a lens through

which to understand the social, economic and political functioning of past societies and reveal features of a society which may otherwise remain hidden from view. Sacred Worlds NUS Press Methods in World History is the first

international volume that systematically addresses a number of methodological problems specific to the field of world history. Prompted by a lack of applicable works, the authors advocate a considerable sharpening of the tools used within the field of study. Theories constructed on poor foundations run an obvious risk of reinforcing flawed assumptions, and of propping up

other, more ideological, constructions. The dedicated critical approach outlined in this volume helps to mitigate such risks. Each author addresses a particular issue of method - for source criticism, archaeological evidence or estimates of economies for example - discussing the problems, giving practical examples, and offering solutions and ways of overcoming

the difficulties involved. The perspectives are varied, the criticism focussed, and a common theme of coalescence is maintained throughout. This unique anthology will be of great use to advanced scholars of world history, and to students entering the field for the first time.

Media Investigates the ideological attitudes of Sikh Gurus toward women and their resulting social impact. This book is an analytical study of the Sikh Gurus' perception of women and their societal roles, with an emphasis on the impact of religious ideology on gender dynamics. Sikhism stands apart in its respectful attitudes towards women. This book explores how these religious perspectives shaped the social relations and evolution of the Sikh community (Sikh Panth), and whether there existed major differences in the views and ideologies of Sikh Gurus, contemporary Bhakti saints and Guru Nanak himself. The book also examines the influence of Sikh Gurus on patriarchal ideology, and whether their normative beliefs were reflected in operative realities. Delving into the Sikh ideological history, so as to fully ascertain and comprehend the nuanced message of the Sikh Gurus who advocated for a more gender sensitive society, this work will help connect past and present, shedding new light on faultlines in our understanding which have occurred over the centuries, and have led us where we are today.

An opening address should ask the right questions, which we expect to answer during the coming years. A good opening address should formulate hypotheses for falsification during the conference or in the near future. After Dr. Groen's excellent lecture yesterday, I feel better about my task, because I feel I am not alone in

asking the ten questions in my abstract. It is an honor for me to give this short paper largely based on my experiences during 15 years as medical director of a rehabilitation center in Bavaria, as a teacher at two medical schools in Munich and Innsbruck, and as an old-fashioned holistic cardiologist. However, it also is a difficult task for me because the subject of this conference

concerning biobehavioral factors in coronary heart disease is controversial, not only in the medical society, but in my own mind as well. When I organized one of the first conferences on stress and coronary heart disease in West Germany in 1976, followed by conferences in 1979 and 1980, the semantic problems between physicians and psychologists were very significant.

However, communication has improved in this area during the last decade. The most encouraging event in this field was a symposium in May 1984 in Rotenburg/Fulda on the topic "Return to Work after Bypass Surgery", organized by a cardiac surgeon, Dr. Walter.

From the exodus of early modern humans to the

growth of African diasporas, Africa has had a long and complex relationship with the outside world. More than a passive vessel manipulated by external empires, the African experience has been a complex mix of internal geographic, environmental, sociopolitical and economic factors, and regular interaction with outsiders. Peter Mitchell attempts to outline these factors over the long

period of modern human history, to find their commonalities and development over time. He examines African interconnections through Egypt and Nubia with the Near East, through multiple Indian Ocean trading systems, through the trans-Saharan trade, and through more recent incursion of Europeans. The African diaspora is also explored for

continuities and resistance to foreign domination. Commonalities abound in the African experience, as do complexities of each individual period and interrelationships. Mitchell's sweeping analysis of African connections place the continent in context of global prehistory and history. The book should be of interest not only to Africanists, but to many other archaeologists

, historians, geographers, linguists, social scientists and their students. **Sri Lanka at the Crossroads of History** Soyinfo Center The University Grants Commission of India is a statutory body set up by the Government of India in accordance to the UGC Act 1956 under Ministry of Human Resource Development, and is charged with coordination, determination and maintenance

Indian Archaeology in Retrospect: Archaeology and historiography: history, theory, and method Disha Publications

The peoples of Sri Lanka have participated in far-flung trading networks, religious formations, and Asian and European

empires for millennia. This interdisciplinary volume sets out to draw Sri Lanka into the field of Asian and Global History by showing how the latest wave of scholarship has explored the island as a 'crossroads', a place defined by its openness to movement across the Indian Ocean. Experts in the history, archaeology, literature and art of the island from c.500 BCE to c.1850 CE use Lankan material to

explore a number of pressing scholarly debates. They address these matters from their varied disciplinary perspectives and diverse array of sources, critically assessing concepts such as ethnicity, cosmopolitanism and localisation, and elucidating the subtle ways in which the foreign may be resisted and

embraced at the same time. The individual chapters, and the volume as a whole, are a welcome addition to the history and historiography of Sri Lanka, as well as studies of the Indian Ocean region, kingship, colonialism, imperialism, and early modernity. Writing Self, Writing Empire Boydell & Brewer
