'One of the oddities of Doctor Who is that you hear so much about what the fans think, and so little from the other 100 percent of the audience (my stats are clinically accurate.) So thank God for a couple who put their love on the line to set the record straight. This is the story of a fan boy who inflicts every episode ever made of Doctor Who on his marriage. Or to put it another way, this is the story of someone with a proper love and understanding of Doctor Who, trying to explain it to her husband.' Steven Moffat Neil loves Sue. He also loves Doctor Who. But can he bring his two great loves together? In January 2011, Neil Perryman set out on an insane quest to make his wife Sue watch every episode of the classic series of Doctor Who from the very beginning. Even the ones that didn't exist any more. And so, over the next two and half years, Sue gamely watched them all. From William Hartnell and Tom Baker to Peter Davison and Paul McGann, the result was a wildly successful and hilariously revealing blog called *Adventures with the Wife in Space*. But the adventure continues. Here Neil Perryman tells the all too true story of Doctor Who fandom. Funny, honest and surprisingly brave, he also captures perfectly the joys - and fears - of sharing the thing you love with the people you love. *Adventures With the Wife in Space* is, at its heart, the story of Doctor Who, and its fans, seen through the eyes of two people - one who knows almost nothing about the programme and another who knows way too much. 'This is a very, very funny book; touching too.' Jenny Colgan

A History of the Book in Australia, 1946-2005 Macmillan

In this groundbreaking cultural history, Lisa Yaszek recovers a lost tradition of women's science fiction that flourished after 1945. This new kind of science fiction was set in a place called galactic suburbia, a literary frontier that was home to nearly 300 women writers. These authors explored how women's lives, loves, and work were being transformed by new sciences and

technologies, thus establishing women's place in the American future imaginary. Yaszek shows how the authors of galactic suburbia rewrote midcentury culture's assumptions about women's domestic, political, and scientific lives. Her case studies of luminaries such as Judith Merrill, Carol Emshwiller, and Anne McCaffrey and lesser-known authors such as Alice Eleanor Jones, Mildred Clingerman, and Doris Pitkin Buck demonstrate how galactic suburbia is the world's first literary tradition to explore the changing relations of gender, science, and society. Galactic Suburbia challenges conventional literary histories that posit men as the progenitors of modern science fiction and women as followers who turned to the genre only after the advent of the women's liberation movement. As Yaszek demonstrates, stories written by women about women in galactic suburbia anticipated the development of both feminist science fiction and domestic science fiction written by men.

Will Australia's once booming book industry be replaced by e-publishing? Are independent publishers and booksellers on the way out? In a world where one 'mega-author' can sell millions of books, can anyone else compete? Paper Empires tells the inside story of Australian publishing over the past half-century. It begins with the larrikin pioneers of the 1950s and 60s and follows the fortunes of the independents and multinationals that followed in their wake. Two fascinating local successes include the reinvention of Allen & Unwin as our largest independent, and the creation of Lonely Planet which has turned a passion for travel into world-beating success. The contributions made by branches of global companies such as Penguin and Scholastic have also been part of this post-war growth. With dozens of in-depth profiles of book trade identities and their companies, as well as many themed case studies, Paper Empires explores the myths and traces the interconnected histories of book publishing, bookselling and reading. Includes: • editing, design and production • booksellers and the retail trade • writers, bestsellers, magazines and pulp fiction • readers and reading •

Indigenous writing and publishing • educational publishing and children's literature • awards and funding • the future of

publishingPaper Empires is a must-read for anyone with an interest in the business of books. (Also available in hardcover)
