Australian Injectable Drugs Handbook Springer Science & Business Media

A concise compilation of the known interactions of the most commonly prescribed drugs, as well as their interaction with nonprescription compounds. The agents covered include CNS drugs, cardiovascular drugs, antibiotics, and NSAIDs. For each class of drugs the authors review the pharmacology, pharmacodynamics, pharmacokinetics, chemistry, metabolism, epidemiological occurrences, adverse reactions, and significant interactions. Environmental and social pharmacological issues are also addressed in chapters on food and alcohol drug interactions, nicotine and tobacco, and anabolic doping agents.

Comprehensive and easy-to-use, *Handbook of Drug Interactions: A Clinical and Forensic Guide* provides physicians with all the information needed to avoid prescribing drugs with undesirable interactions, and toxicologists with all the data necessary to interpret possible interactions between drugs found simultaneously in patient samples.

Extended Stability for Parenteral Drugs Hogrefe & Huber Publishing

Toxicology studies are carried out on all drug substances to ensure safety. This book provides an overview of the methodology and requirements of pre-clinical safety assessments

of new medicines. with the focus on medicinal drugs - the most important safety issues of drugs are covered, including registration requirements of new drugs and pharmacovigilance. This is an introductory text for students at BSc, MSc and PhD levels, and will be an excellent companion to pharmacology textbooks, combining a broad treatment of the issues relevant for assessing the safety/efficacy balance of a new drug with *The Harriet Lane Handbook* Lippincott Williams & Wilkins. Written and peer reviewed by experts in practice and academia, the 19th edition of the *Handbook of Nonprescription Drugs: An Interactive Approach to Self-Care* is an authoritative resource for students and for health care providers who counsel and care for patients undertaking self-treatment; nonprescription drugs, nutritional supplements, medical foods, nondrug and preventive measures, and complementary therapies. Its goal is to develop the knowledge and problem-solving skills needed to assess a patient's health status and current practice of self-treatment, to determine whether self-care is necessary or appropriate, and, if appropriate, to recommend safe and effective self-care measures. *Drugs During Pregnancy and Lactation* ASHP

This manual and reference work provides a source of analytical data for drugs and related substances. It is intended for scientists faced with the difficult problem of identifying a drug in a pharmaceutical product, in a sample of tissue or body fluid, from a living patient or in post-mortem material. Volume One contains 32 chapters covering the practice of and analytical procedures used in forensic toxicology. Volume Two contains over 1750 drug and related substance monographs detailing: physical properties; analytical methods; pharmacokinetic data; and toxicity data, as well as expanded indexes and appendices. These volumes should be useful for all forensic and crime laboratories, toxicologists and analytical chemists, pathologists, poison information centres and clinical pharmacology departments.
