Law's Judgement elucidates and defends a feature of contemporary law that is currently either overlooked or too glibly dismissed as morally troublesome or historically anachronistic. That feature is the abstract nature of law's judgement and its three components show that, when law judges us, it often does so in ignorance of our particular characters and abilities, on the one hand, and in ignorance of our context and circumstances, on the other. Law's judgement is thus insensitive to all or much that makes us the particular people we are. The book explores various connections between this mode of judgement and some of our most important legal and political values. It shows that law's abstract judgement is closely related to important juristic conceptions of personhood, responsibility and impartiality, and that these notions are not without moral significance. The book also examines the connections between modern law's judgement and three of our most important political values, namely, dignity, equality and community. It argues that, if we value particular conceptions of dignity, equality and community, then we must also value law's judgement. Illuminating these connections therefore serves a double purpose: first, it makes a case against those who counsel liberation from law's abstract judgement and, second, it redirects attention to the task of morally evaluating law's abstract judgement in its own terms.

This work challenges pastors, seminarians, and active members of the laity to rethink the social character of their ministry. Dieter Hessel calls on parish communities to "meet human need with good Samaritan love while acting for justice with prophetic boldness." In this updated edition, Hessel assesses major new developments that have occurred in both church and society since the first publication of *Social Ministry*. He gives special attention to the uncertainty that churches face today in regard to their public role.

John Morrill has been at the forefront of modern attempts to explain the origins, nature and consequences of the English Revolution. These twenty essays -- seven either specially written or reproduced from generally inaccessible sources -- illustrate the main scholarly debates to which he has so richly contributed: the tension between national and provincial politics; the idea of the English Revolution as "the last of the European Wars of Religion"; its British dimension; and its political sociology. Taken together, they offer a remarkably coherent account of the period as a whole.

Jurisdiction and Cross-Border Collective Redress Penguin

This text covers the scope of world order studies today, and explores the methodology of this important field.

How Learning Works Bloomsbury Publishing

In recent decades, the rise in cross-border law violations has harmed numerous victims around the globe. The damages are often dispersed and low-level. As a result, the private enforcement gap has deepened and collective redress represents an interesting procedural instrument that is able to provide effective access to justice. This book analyses thoroughly the dominant collective redress models adopted in the EU. Data from 13 Member States has been catalogued and categorised. The research mainly focuses on the consumer law field but frequent references to financial and data protection-related cases are made. The dominant collective redress models are then studied from a private international law perspective. In particular, the book highlights the current mismatch between collective redress on the one hand, and rules on international jurisdiction on the other. Additionally, it notes that barriers to cross-border litigation

remain significant for victims and their representatives. The unprecedented empirical study included in this book confirms that statement. Observing that EU measures have not satisfactorily lowered those barriers, the author proposes the creation of a new head of jurisdiction for cases of international collective redress. This book will be of interest to private international law scholars, researchers, students, legal practitioners, judges and policy-makers. It is a reference point for those with an interest in cross-border collective redress in particular, and private international law in general.

Praise for *How Learning Works* "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning." —Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, *Tools for Teaching* "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." —Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science

of learning to college teaching, and they graciously share it with you in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, e-Learning and the Science of Instruction; and author, Multimedia Learning
Cities in a Globalizing World Routledge

'The world has entered the urban millennium. Nearly half the world's people are now city dwellers, and the rapid increase in urban population is expected to continue, mainly in developing countries. This historic transition is being further propelled by the powerful forces of globalization. The central challenge for the international community is clear: to make both urbanization and globalization work for all people, instead of leaving billions behind or on the margins. Cities in a Globalizing World: Global Report on Human Settlements is a comprehensive review of conditions in the world's cities and the prospects for making them better, safer places to live in an age of globalization. I hope that it will provide all stakeholders - foremost among them the urban poor themselves - with reliable and timely information with which to set our policies right and get the machinery of urban life moving in a constructive direction.' From the Foreword by Kofi Annan, Secretary-General, United Nations. Cities in a Globalizing World presents a comprehensive review of the world's cities and analyses the positive and negative impacts on human settlements of the global trends towards social and economic integration and the rapid changes in information and communication technologies. In this Global Report, the United Nations Centre for Human Settlements (Habitat) draws on specially commissioned and contributed background papers from more than 80 leading international specialists. The report focuses on recent trends in human settlements and their implications for poverty, inequity and social polarization. It develops advance knowledge for urban planning and management policies in support and promotion of inclusive cities and good urban governance. This major and influential report is the most authoritative and up-to-date assessment of human settlements conditions and trends. Written in clear, non-technical language and supported by informative graphics, case studies and extensive statistical data, it should be an essential tool and reference for academics, researchers, planners, public authorities and civil society organizations around

the world.

 This book examines the theories and practice of how to control corporate behaviour through legal techniques. The principal theories examined are deterrence, economic rational acting, responsive regulation, and the findings of behavioural psychology. Leading examples of the various approaches are given in order to illustrate the models: private enforcement of law through litigation in the USA, public enforcement of competition law by the European Commission, and the recent reform of policies on public enforcement of regulatory law in the United Kingdom. Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory, the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied. Sectors examined include financial services, civil aviation, pharmaceuticals, and workplace health & safety. Key findings are that 'enforcement' has to focus on identifying the causes of non-compliance, so as to be able to support improved performance, rather than be based on fear motivating complete compliance. Systems in which reporting is essential for safety only function with a no-blame culture. The book concludes by proposing an holistic model for maximising compliance within large organisations, combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders, held together by a unified core of ethical principles. Hence, the book proposes a new theory of ethical regulation.
