CANTRELL MORIAH

An Evidence-based and Best Practice Approach to Techniques and Processes
Sagamore Pub Llc

Outdoor Adventure Education: Foundations, Theories, Models, and Research steps students in the theories, concepts, and developments of outdoor adventure education, preparing them for careers in this burgeoning field. This text is based on author Alan W. Ewert's pioneering book *Outdoor Adventure Pursuits: Foundations, Models, and Theories*. Ewert and Sibthorp, both experienced practitioners, researchers, and educators, explore the outdoor adventure field today in relation to the changes that have occurred since Ewert's first book. The authors present a comprehensive text on outdoor and adventure foundations, theories, and research that will provide the basis for the next generation of professionals.

Outdoor Recreation CABI

"The Analysis of the Outdoor Recreation and Wilderness Situation in the United States is intended to build upon past studies and to establish a new and better information base on outdoor recreation and wilderness demand and supply. Also, this assessment answers several key questions which will help identify ways to meet demand through the year 2040. Specifically, it is to serve as the foundation for the Forest Service's development of a 50-year program through which that agency can help satisfy the nation's outdoor recreation and wilderness needs."Abstract.

The Wilderness Within Sagamore Publishing LLC

Community Leisure and Recreation Planning offers an up-to-date, evidence-based approach to planning community leisure and recreation facilities, programs and services. It introduces readers to key theory and best practice in the planning of effective leisure and recreation projects. The book defines planning, leisure, recreation and other key concepts and explains why a thorough planning process

is essential to achieving effective outcomes. It presents a comprehensive, integrative four phase model for undertaking leisure and recreation planning, including: pre-planning, planning research, preparing a plan, and implementing, monitoring and evaluating the outputs and outcomes of a plan. It provides a conceptual rationale for each component of the planning process, a detailed explanation of the tools and techniques that can be used, and extensive examples and international case study materials to demonstrate their use. The principles and techniques explained in the book are applicable at a range of community levels from small individual sites to regions, states and even countries. This is an essential course text for all leisure and recreation courses, and invaluable reading for academics, practitioners, stakeholders and students working in leisure and recreation planning, events, culture and sport.

An Analysis of the Outdoor Recreation and Wilderness Situation in the United States, 1989-2040 Sagamore Pub Llc

Design for Outdoor Recreation takes a detailed look at all aspects of design of facilities needed by visitors to outdoor recreation destinations. The book is a comprehensive manual for planners, designers and managers of recreation taking them through the processes of design and enabling them to find the most appropriate balance between visitor needs and the capacity of the landscape. A range of different aspects are covered including car parking, information signing, hiking, waterside activities, wildlife watching and camping. This second edition incorporates new examples from overseas, including Australia, New Zealand, Japan and Eastern Europe as well as focusing on more current issues such as accessibility and the changing demands for recreational use.

Environmental Impact Statement CABI

This is primarily a text for undergraduate students preparing for careers in the management of recreation settings. Coverage includes the concepts and skills required to conduct recreational activities

and to supervise volunteer and paid staff in recreation agencies and organisations. It can be used for a course on recreation leadership, recreation supervision, or recreation activity methods, and because of its comprehensiveness, the book is also useful as a resource for practising recreation professionals. Examples are drawn widely from outdoor recreation, therapeutic recreation, sport and fitness, adventure settings, municipal services, and hospitality and tourism.

Human Kinetics

This edition probes the importance of leadership in the recreation, parks, and leisure service industry. Integrating theory with practice, the book focuses on a number of interrelated elements that influence leadership in recreation, parks, and leisure service organizations such as theoretical and foundational information, leaders within groups, and leadership within a number of recreation, parks, and leisure service settings.--[book cover] A National Assessment of Demand and Supply Trends Ingram

The most significant change in this edition of Leisure Education Program Planning is the infusion of information gleaned from writings by some of the leaders of the positive psychology movement. These readings provide valuable perspectives and insights about concepts related to leisure and leisure education. The book is organized into five sections. The first section contains six chapters designed to increase understanding of principles related to leisure and leisure education. The second section provides recommendations and research on leisure education, reviewing previous efforts to implement and understand leisure education programs. The third section provides considerations for developing the content (what to teach) of leisure education. The fourth section addresses the process (how to teach) of implementing leisure education programs. The final section of the book contains specific leisure education programs associated with six possible leisure education components (appreciate leisure, be aware of self in leisure, be self-determined in leisure, interact socially, use

leisure resources, and make leisure decisions). The author has field-tested and evaluated various components of these leisure education programs.

Forests at the Wildland-Urban Interface
Gardners Books

This book provides students and practitioners with perspectives on the management of recreational therapy heretofore unavailable to them. Many of the management concepts apply to middle level managers, but the focus of the book is on first-line recreational therapy managers and the areas of management identified by the National Council on Therapeutic Recreation Certification (NCTRC). In-depth coverage is given to the five basic functions of management: planning, organization, staffing, influencing, and controlling. In addition, chapters are provided on key concepts integral to the management of recreational therapy programs. Included are chapters on internship supervision, clinical supervision, volunteer management, and managing marketing. The final chapter, *Issues and Concerns for Managers*, is unique in that it contains areas of substantial importance to managers that have received little attention in the recreational therapy literature. The format for the book is readable and easy to follow. Each chapter lists objectives for the chapter, gives definitions of key terms used within the chapter, and ends with a conclusion or summary of the chapter.

Introduction to Outdoor Recreation Human Kinetics

Leisure Program Planning and Delivery provides a comprehensive three-step plan for successful programming of leisure services and operational management of program systems in recreation and leisure service organizations. Grounded in contemporary professional practice and real-world applications, the book provides a systematic plan for students to learn the essentials of successful recreation programming, with examples of a variety of activities in community, outdoor, sport, cultural arts, and tourism sectors of the field.

Applications for Leisure, Sport, and Tourism Routledge

This book focuses on the issues and trends in outdoor, 'nature-based' recreation, leisure and tourism and explores the implications for public policy, planning, management and marketing. It is intended as supplementary reading for advanced students and is a useful reference tool.

Principles and Procedures Taylor & Francis
Therapeutic Recreation Program Design uses the most up-to-date information and

powerful study tools to help students learn how to synthesize different elements of therapeutic recreation into one cohesive program. The Fourth Edition features comprehensive end-of-chapter materials including practice tests, discussion questions, and activities that provide students with an easy, accessible way to study the material. The book has been thoroughly updated to include the latest government/organization regulations, and more client examples have been woven through each chapter to give students practical illustrations of the theories presented in the text.

Adventure Programming and Travel for the 21st Century Sagamore Pub Llc

Forests at the wildland-urban interface are at increasing risk due to the impacts of urbanization. Conserving and managing these forestlands for continued ecological and social benefits is a critical and complex challenge facing natural resource managers, land-use planners, and policymakers. *Forests at the Wildland-Urban Interface: Conservat General Technical Report RM. Outdoor Recreation Planning* Whether visitors or not, all citizens own public land and its associated resources... Professional, responsive, and carefully considered planning is critical to success in developing, managing, and making accessible outdoor recreation resources. *Outdoor Recreation Planning* provides guidance for defining where outdoor recreation resource management should and could be going forward and sound advice, principles, and approaches for identifying pathways for getting there. Responsive outdoor recreation resource planning must actively and interactively engage, early and often, the stakeholders, citizens, and others the planning organization is working to serve. Considered planning will look carefully and comprehensively at the opportunities and constraints for achieving success. *Outdoor Recreation Planning* is unique because it has been prepared by academics and planning practitioners working together to provide a teaching guide as well as a planning applications resource. The authors have practical experience in advising and helping to develop recreation resource planning rules and procedures and in developing master plans for public properties. It is a must read for anyone interested in learning about, protecting, managing, and planning for public outdoor recreation resources. *Leisure Matters* The State and Future of Leisure Studies Whether visitors or not, all citizens own public land and its associated resources... Professional, responsive, and carefully

The authors have practical experience in advising and helping to develop recreation resource planning rules and procedures and in developing master plans for public properties. It is a must read for anyone interested in learning about, protecting, managing, and planning for public outdoor recreation resources.

Providing and Managing Natural Resource Based Opportunities CRC Press

Here is an ongoing, comprehensive assessment of trends, current situations, and the likely future of outdoor recreation supply and demand for the U.S. Readers can examine new and different aspects of the national demand, its resemblance to the past, and trends in the supply of outdoor recreation opportunities submitted from the private and public sectors. The technological, consumption-driven urban society of today demands a different mix of recreational pursuits and services and places a much heavier demand on our rich natural resources.

Trends in Outdoor Recreation, Leisure, and Tourism Benjamin-Cummings Publishing Company

Recreation Programming: Designing, Staging, and Managing the Delivery of Leisure Experiences incorporates information and techniques based on current knowledge about experiencing leisure and the current professional techniques and practices that programmers need to learn and master to design, stage, evaluate, and manage leisure experiences in any organization including government, commercial, and not-for-profit agencies. This eighth edition teaches the programmer to design and stage program services by learning the theory and techniques of recreation programming including (1) basic leisure

theory that explains how leisure is experienced; (2) the generic structure of situated activity systems in which social interaction produces leisure experiences; (3) how programs are designed; and (4) procedures and techniques that programmers use to stage, evaluate, and manage recreation programs in a variety of agencies.

Foundations, Theory, and Research

Venture Pub

This third edition was written to be a resource for TR professionals and students so that they can gain insight into some of the facilitation techniques used by TR specialists. The facilitation techniques provided in this edition are not intended to be comprehensive; rather, we attempt to present those techniques that many of the authors implemented while delivering TR services.

1989-2040 Venture Pub

This fourth edition is intended for university students who may have an interest in becoming employed in the parks profession. The book explores the responsibilities of staff and the problems and challenges associated with managing parks in the 21st century. Particular attention is paid to the structure of park organisations, planning, decision making, and politics that ultimately influence the way parks are managed. Part I provides an overview of parks and park management. Historical aspects of the development of parks are reviewed and detailed. Part II specifically addresses the multitude of park administrative functions, such as organisational structures, park policies,

laws and risk management, funding, personnel, and concludes with maintenance and safety concerns. Part III provides information on resource planning and management of the resources through citizen involvement, planning, facilities, and environmental management issues. Part IV is an overview of visitor use issues and protection of parks. Topics include visitor conflicts, vandalism, law enforcement, fire management, interpretation, and visitor management services. Finally, Part V provides a broad overview and examples of sustainable practices in park management, including tools such as ROS, LAC, and VERP and possible solutions to the numerous challenges that park managers must address. It is our belief that sustainable management practices and planning practices designed with environmental management and visitor management are the keys to successful park operations. Similar to the 3rd edition, the 4th edition utilises where applicable the practical and sage advice of Grant W Sharpe, Charles H Odegaard, and Wenonah Finch Sharpe in the earlier editions of this book. We have retained the essence of the material, and the broad topics that those authors provided as a framework for park management. Readers will note that some references are older. We retained references that have historical significance and have been overlooked in the current literature, which are included at the end of each chapter under General References. Some of these ideas are currently accepted as common knowledge; however, we all can benefit from

understanding the origin of ideas that have influenced park management. *The Camper's Guide to Outdoor Pursuits* Venture Publishing Incorporated, U.S. Used in numerous universities throughout the United States, Canada, Australia, and New Zealand, this book provides programming insights for educators, practitioners, and students. The book will present readers with the vital tools necessary in providing successful programs for their patrons.

Introduction to Park Management

McFarland

This book presents an international perspective on providing theoretical and practical knowledge about the planning, delivery, and management of adventure programs (including travel), products, and services. Designed for undergraduates, graduate students, and practitioners, it is also intended for the Adventure specialist who has responsibility for planning and managing adventure travel and programming products and services with consideration of group dynamics, finance, dimensions of sustainability, human resources, ethics, risk management, marketing, and technology.

The State and Future of Leisure Studies

Routledge

Studies the recreational conduct of the individual and those responsible for planning, managing, and evaluating park and recreation services, reconciles recreational needs with the social and natural environment effected, and applies the established philosophical foundation to emerging issues.
